The Digital Platform that empowers your
Industry 4.0
Transformation

OCTOBER 2021

Transform Raw Data to Actionable Intelligence

What We offer

An integration layer that blends various IoT data and enables their transformation to easily accessible business value.

- **Data Unification**

Sensors and data come for different sources and are part of a topology in one or more establishments. The benefit of homogenizing these data is huge. METIS unifies all data in one meaningful and human readable catalogue for everyone to read and use.

- **Data Cleansing & Synchronization**

Sensor data are produced with different time granularity and at times can be flawed. METIS prepares the data and creates clear datasets that can be used instantly for analytical calculations and visualizations.

- **Transformation of Human Expertise to Software Automation**
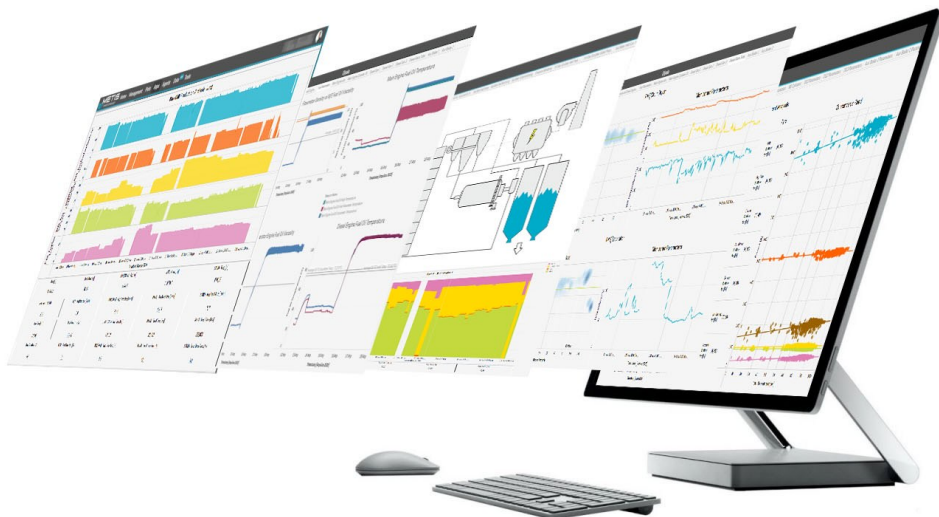

Facilitate the knowledge transfer from human experts to automated agents that expose all meaningful insights to the user or to new Datasets ready to be used to a higher analytical process enriching the Data Ecosystem of your company.

- **Simplification of data utilization**

METIS takes away the need for your users to have technical skills to use the results, datasets or reports. Our platform disseminates to all users, all data, insights and reports in a very easy way, the minute they are created through a simple web interface.

- **Easy Integration**

METIS Integrates with all major data analytic or reporting tools like Tableau, Power BI etc.

- Collect
- Organize
- Store
- Process
- Enhance
- Maintain
- Disseminate

Unlimited Storage
to keep safe your big data

Unlimited Processing Power
for your analytical calculations

Process scheduling & orchestration
to maintain your big data

Microsoft Azure **databricks**

We work closely with selected corporate partners who are making an impact in the area of their specialization and with whom we share the same vision for the Industry 4.0. We support all major databases and storages.

METIS Cyberspace technology S.A   4 Sachtouri str. & 2 Posidonos Av., 176 74, Kallithea, Athens, Greece   www.metis.tech

Why METIS

- Proven solution across industries. METIS is a key player in the digitalization of the Maritime Industry.
- Holistic big data and analytics platform to accommodate all your data workload with elastic / unlimited infrastructure
- Trusted workflows that eliminate the technical gap between data and insights.
- User Friendly UI which allows more users, with no technical skills, to be part of this data revolution in just a few clicks.
- Minimal data exploration process times. Enable "what happened" scenarios and data sharing in just a few minutes.

We enable your executives to make justified decisions and take prompt actions

We enhance your data scientists' skills to accommodate your business needs

Collect	Store	Enhance	Disseminate

Organize	Process	Maintain

Digitalization Benefits

Digitalization process offers numerous benefits:

- Organize all your data and give access to a greater audience means building a greater think tank that can deliver greater results.

- Frees experts from tedious or recurring tasks and processes and provides space for more sophisticated procedures which significantly enhance the value for the business..

- Provides absolute control over the infrastructure. Monitoring and Alerting, an essential part of Industry 4.0 provides clear understanding and better handling of the infrastructure in all aspects such as predictive maintenance or critical conditions.

- Enables to streamline business process and provide real business value (such as cost and supply chain optimization)

Your Lifetime Partner

- Focuses on knowledge transfer to our partners. Metis wants to up-level the data science skills of your team to meet your company's expectation. Digitization is a long running procedure and METIS is your partner to this journey.

- Provides the expertise and a team of the best experts in the market on digitization, Machine learning and big data even if you don't have such a team.

- You are on the cutting edge of technology. Metis is an early adopter of all technology innovations in the field, so are you!
