

Unified Healthcare Delivery Reporting

A single access point for all reporting

Bring your clinical reports from Epic and non-clinical reporting into a single unified portal so users can easily access all their reports, dashboards, and analytics.

Discovery & Access Request

- Easily access reporting across all tools
- AI-enabled discoverability for the entire reporting portfolio
- Request access for all reporting natively or through ServiceNow

Effective BI Governance

- Certify the most useful dashboards & analytics
- Ensure that users are not accessing duplicate or obsolete reporting
- Improve data literacy by surfacing useful reporting metadata

Increased Engagement

- Create delightful, role-based user experiences
- Push critical reports to email and phone
- Alert users to significant KPI changes
