Achieve more with effective Volunteer Management

Our experts are here to help you solve key challenges such as:

- How to attract, recruit and onboard your volunteers

- What tools there are to effectively manage and engage with your volunteers

- How to gain a single source of truth and a 360-degree view of every volunteer

- How to create volunteers for life and increase mission impact

Preparing for a digital future

In today's challenging climate, now more than ever, charities need to ensure they are utilising the right technology to help them build strong relationships with their volunteers.

But which solution do they turn to that will meet the needs of their organisation now and in the future?

Let's work together

Introducing the latest Microsoft Cloud for Nonprofit solutions to help you recruit, onboard and engage volunteers so you can deliver effective programming.
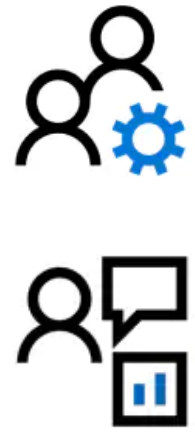

Book 5 days of consultancy with our team to discuss your requirements in greater detail and see for yourself how Microsoft's Power Platform and its Dynamics 365 Platform can work powerfully together for all your volunteer management and engagement needs.

The solution:

Our Volunteer Management and Engagement solution allows you to easily manage the people who volunteer for your charity. From the moment they apply to become a volunteer, it will help you to vet and approve every person and then store that information securely. It will enable you to document the skills every volunteer has, allowing you to deploy the right people to the most appropriate tasks.

Furthermore, you can capture every hour that people have volunteered for your charity and connect this time to specific activities that your charity is carrying out such as fundraising events, allowing you to closely monitor the resources required for each activity.

What to expect:

Day 1	Day 2	Day 3	Day 4	Day 5
Introduction to the Microsoft Nonprofit Common Data Model.	Introduction to the Volunteer Management Power App – fit/gap analysis.	Introduction to the Volunteer Engagement Power Portal - fit/gap analysis.	Analysis of data capture and adoption outcome write up.	Playback of key adoption targets.

What can we provide?

m-hance is a Microsoft Gold Partner and leading provider of Microsoft Dynamics solutions tailored for the Nonprofit sector. What's more, because we've worked in this space for almost 20 years, we understand the unique obstacles and challenges that charities face and how our solutions can help to overcome them.
