Preparing for a digital future

In today's challenging climate, now more than ever, charities need to ensure they are utilising the right technology to help them build strong relationships with their supporters and earn trust by being transparent about where donations are being used.

In this new reality, how do you envision the future state of your organisation? Build your transformation strategy with Microsoft Catalyst, a proven and powerful approach to innovation.

Let's ideate together

As part of Catalyst, meet with our experts and run an envisioning workshop, where we can ideate together using design led thinking concepts and jointly define how to enable the digital transformation of your organisation.

This one-day briefing starts with a review of your charity objectives, followed by mutual discovery and visualisation of solutions, ending with a clear, actionable picture of how we can help you reach your charity's goals.
