

Plan.UseWise™

Cost center planning with collaboration and security embedded

About UseWise™

We are building a multi-cloud platform that will enable companies to use the public cloud in a transparent manner.

Cost center planning with Plan.UseWise™

Plan.UseWise™ enables companies to execute the cost center planning process easily and in an automated manner using familiar M365 tools.

Plan.UseWise™ delivers cost center planning and budgeting using modern Microsoft 365 services with security and adds user empowerment and simplicity of use to the mix.

If you have any questions and would like to be contacted about Plan.UseWise™ please fill out [this form](#) and we will contact you.

Business process of cost center planning and budgeting solved

With Plan.UseWise™ you can create companies within your group as separate planning entities in the application, define planning periods you need, cost centers and charts of accounts. Planning tables are shared with groups of individual planners and they enjoy many features making their planning easy.

Easy to use

CFO and controlling are in charge of the application and they create and manage the entire planning process including Microsoft security groups that are used to assign user rights.

Security and privacy

Plan.UseWise™ is built on top of M365 and Azure, therefore security and privacy of Microsoft are embedded into our application.
