Challenges

Mobility and speed of communications strongly impacted the business landscape. Leveraging most advanced collaboration tools improve the efficiency of daily communications.

Competitive advantage is determined by how well Customer's organization adapts to new Standards

- Two-thirds of employees' time spent communicating with other people
- Inefficient and poor-quality communication and collaboration tools ;
- Market environment is always moving, faster than ever before;

Ideal Solution

- Access anytime, from anywhere ;
- Instant messaging capabilites ;
- Reading acknowledgement ;

- Effective collaboration tool with text, streaming, recording;
- Functionnality-rich and always updated
- Investment protection

Desired Outcomes

Share information, coordinate projects, discuss best practices, and build communities for a more productive way of working, within and across the enterprise.

- No more wasted time searching for information;
- Everything is recorded in one, easy to find place;
- Chat in real time and get immediate feedbacks;
- Productivity gains and modern application Architecture ;

ADOPTION BY PHASES: START, EXPERIMENT THEN SCALE

START

Build the skills :

- Gather your team together
- Set up initial teams
- Assess organizational readiness
- Use Teams to begin adoption planning

EXPERIMENT

Controlled growth :

- Identify scenarios that would immediately benefit from Teams capabilities
- Early Adopter program and champions
- Make decisions about governance
- Gather feedbacks.

SCALE

Use learnings to support the broad scale enablement :

- Define outcomes and success measures
- Select service strategy
- Engage stakeholders
- Design and launch an awareness campaign and a training program.
