Master Your Mining Data

Enhance your organisation's data culture and drive better business outcomes with access to central, secure and up-to-date data.

Reduce Risk

Share data and knowledge with structured file management providing transparency, clarity, traceability and compliance.

Break Down Silos

Streamline cross-department collaboration to furnish greater team information and insights.

Enhance Productivity

Stay on track and on task with tools that ensure a clear, structured, and repeatable workflow.

Improve Usability

Uncomplicate file access with a customised solution that reflects your ways of working.

A data and task management platform

Micromine Nexus is a user-friendly data and task management solution built for mining teams. Whether you're a geoscientist, mine engineer, manager, or project stakeholder Micromine Nexus makes your projects more accessible, manageable, and

collaborative. With enhanced workflow designs, advanced file administration, flexible task management and automated team notifications, Micromine Nexus ensures that you never get lost in your mining data again.

Uncomplicate your team data

Overcome the challenges of manual management that often lead to unstructured, redundant and discrepant master data. Break free from cumbersome spreadsheets and complex storage structures with a user-friendly solution. Micromine Nexus helps teams drive faster, better and more informed business decisions by upholding quality at the data source.

Whether you're a team of one or one hundred, Micromine Nexus provides the tools needed to manage your valuable exploration and mining data.

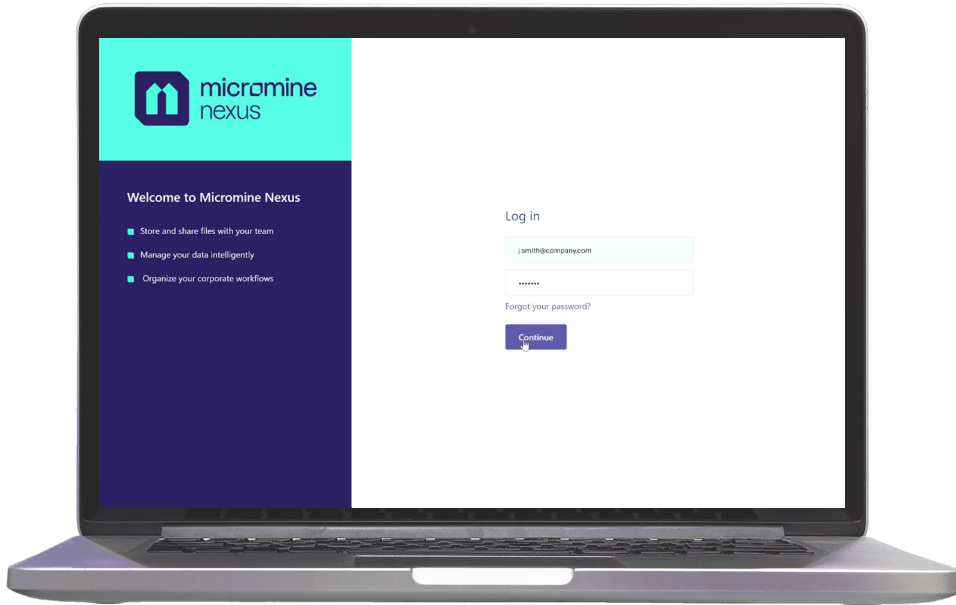

The future of mining teamwork

Whether you're adding new drillhole data, updating a wireframe, building the block model or optimising a stope design, Micromine Nexus digitally documents your journey – storing every file, every update and every insight.

Maintain master data while cultivating productive workstreams using sophisticated file versioning and branching logic that makes sense of your progress. Stay on top of key activities with integrated task management tools that allow you to create and track the progress of custom team projects, ensuring a clear, structured and repeatable workflow is maintained.

Get new starters up to speed quickly with access to detailed records and if someone leaves, your valuable data and their detailed insights won't go with them.

Plus, never miss an important update with automated platform notifications.

Get in touch with your local Micromine team to request a demo or visit our website to learn more.

**Micromine Nexus public cloud offerings are available through a Free of Charge Scheme to clients with an active Micromine Origin or Beyond Annual Subscription Licence. This offer is subject to Terms and Conditions, with the relevant tier offering subject to detailed eligibility requirements. Contact Micromine to check your eligibility or find out more.

Enjoy the benefits sooner
– Getting started with
Micromine Nexus

Step 1

Subscribe to your needs

Choose the subscription plan that best suits your team or individual requirements.

Step 2

Deploy to suit

We deploy, then you configure just the way you like it with user-friendly admin tools.

Step 3

Collaborate across teams

Invite team members to join and share insights and information, as well as track tasks progress.

Step 4

Integrate your software

Connect your Micromine Origin and Beyond projects at just the click of a few buttons with in-product integration.

Subscription offerings:

Micromine Nexus public cloud offering is free for eligible Micromine Origin and Beyond annual subscription users*.
