

ArxBC 365

4 hours Briefing

This collaborative discussion will explain how the integration between Microsoft Dynamics 365 Business Central and Arxivar can grow your productivity through a modern document management.

"Paperless" and "no more paper" are words that we listen every time we speak about Document Management. Microsoft Dynamics 365 Business Central have inside many features that help to gain this goal but sometimes in not enough.

We have implemented an integration app with Arxivar Next to extend the features of Business Central with a modern document management in order to easily and efficiently organize all documents.

For the Italian companies this solution provides a complete integration with SDI, Electronic Invoice Fiscal System and Electronic Storage in according with laws.

This four hours of briefing is designed to help you understand how you can manage your documents, talking with you about your needs.

Agenda

Based on your specific need you will discuss about:

- How to Identify key documents in your organization
- How select the main properties for document you will use as key search
- Discuss about the workflows you plan to implement in your archiving procedure
- For Italian company a presentation of the integration for Electronic Invoice

This briefing will be an interactive meeting so clients should come prepared to discuss their needs about document managements.
