Deploy Microsoft 365 Copilot

Your Guide to a Smoother, More Productive Microsoft 365 Experience

Unlock the Full Potential of Copilot

Microsoft's AI assistant, Microsoft 365 Copilot, stands as your trusted partner in achieving unparalleled efficiency and time-saving capabilities within the Microsoft 365 ecosystem. Seamlessly integrating with your daily tools, Copilot becomes your guiding force across an array of tasks, from capturing meeting notes in Teams to simplifying lengthy documents and crafting captivating PowerPoint presentations. By infusing your familiar tools with cutting-edge capabilities, Copilot paves the way to a state of unmatched productivity.

What's Included in a Copilot Deployment?

Adoption & Change Management: Our experts will guide you in crafting a tailored strategy to encourage adoption and manage the transition effectively.

Strategic Messaging: Crafting compelling communication that resonates with your team and stakeholders.

Stakeholder Identification: Identifying key individuals and teams crucial to the success of your Copilot journey.

Champion Activation: Empowering your internal champions to lead and inspire their teams.

License Allocation: Efficiently distribute licenses to the right users, ensuring optimal usage.

Enablement Sessions: Interactive workshops showcasing potential Copilot use cases and strategies.

ADKAR Methodology: We employ the renowned ADKAR methodology for adoption and change management, ensuring a structured, effective transition.

Dedicated Project Manager: Your journey is overseen by a dedicated project manager, guaranteeing a smooth rollout.

Post-Deployment Support: Our commitment extends beyond deployment with ongoing support for a seamless Copilot experience.

The Benefits

Enhanced Content Quality
Copilot acts as a virtual writing assistant, offering real-time suggestions for grammar, style, and phrasing, ensuring high-quality content creation.

Personalized Support
Copilot adapts to user preferences and behaviours, offering tailored recommendations to enhance productivity and the overall user experience.
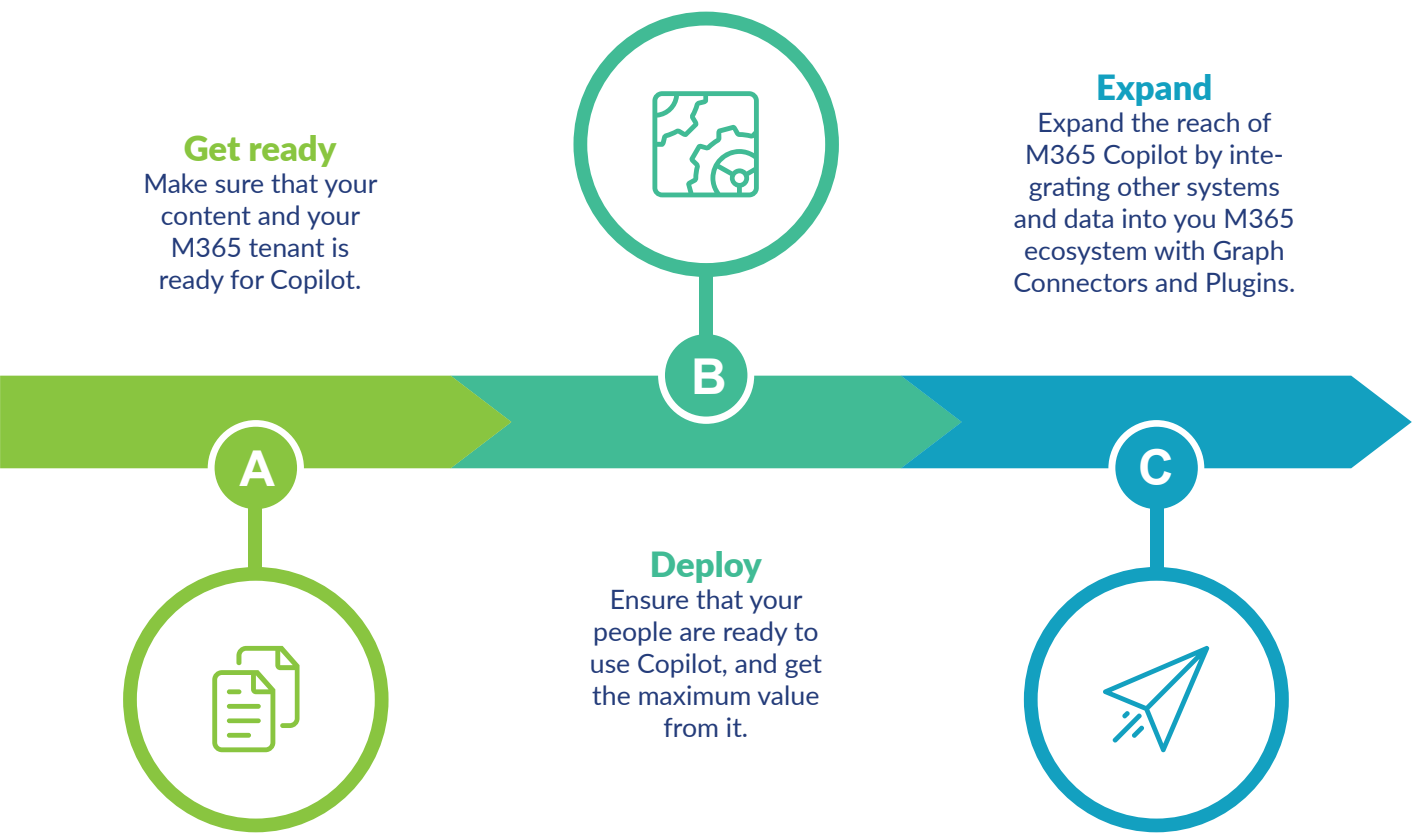

Effortless Collaboration
Integrated into Microsoft Teams, Copilot automates tasks like note-taking and action item tracking, enhancing collaboration during virtual meetings and reducing administrative overhead.

Data Insights Made Simple
Copilot's data analysis and visualization capabilities empower users to extract meaningful insights, presenting data in a clear and actionable manner for informed decision-making.

Unlock the Full Potential of Microsoft 365 with Mint Group

With a projected 2-week engagement, we're poised to turn your investment in Microsoft 365 Copilot into a catalyst for productivity and innovation. Get ready for a transformative journey!

Get ready
Make sure that your content and your M365 tenant is ready for Copilot.

Expand
Expand the reach of M365 Copilot by integrating other systems and data into you M365 ecosystem with Graph Connectors and Plugins.

Deploy
Ensure that your people are ready to use Copilot, and get the maximum value from it.

Pricing - Get Ready for Copilot

Service / Output	Small (500< users)	Medium (501-4999 users)	Large (5000+ users)
