

Simplified Dynamics 365 Evaluations and Implementations

With **ProActive™**

Shorten Your Dynamics 365 CRM Sales Cycle with **ProActive™**

It's time to do things differently. The business applications implementation model has changed very little over the past 20 years. There has been little opportunity to reduce costs without introducing risk or impacting project deliverables. UNTIL NOW.

ProActive™, an innovative cloud-based analysis and design platform, simplifies, automates and accelerates the Dynamics 365 CRM process from evaluation to implementation. This can significantly reduce overall project costs and timescales, whilst mitigating project risk and increasing quality.

Reduce your customers project risk and deliver a predictable outcome

Deploy Dynamics 365 CRM faster and more consistently without compromising on quality

Accelerate customer return on investment

The ProActive™ is broken into two parts which covers the end-to-end implementation of a Customer Engagement (CE), including Sales, Marketing, Customer Voice, Customer Insights and Field Services.

ProActive™ Discover allows customers to quickly evaluate Dynamics 365 with confidence to make an informed business applications decision.

ProActive™ Transform completes the analysis, solution design and project flight plan faster, more consistently and with less risk.

From as little as 2 weeks commitment from your team, you can use the power of ProActive™ Discover to deliver the following outputs:

01

A detailed fit-gap analysis of required product

02

Indicative implementation costs and project scope

03

Accurate licensing volume and cost estimates

04

Content for easy RFI/RFP/RFQ Presentations

Start with a **ProActive™** today.
