SECURITY AND USABILITY FOR *ALL* BUSINESSES

M MIRACL ®

The login you love

Run a small or medium business? Using enterprise tools such as Office 365, Active Directory or G-Suite for Business?

If this is you, your employees are likely jumping through hoops every time they forget a password. And wasting time logging in with multiple devices. They may also be keeping a list of passwords, or using the same password across multiple accounts–both represent major security risks.

Behind the scenes, IT Support is wasting time and money on password resets. Onboarding new users and removing departing employees from multiple apps is further draining their productivity.

All this wasted time and money just to log in? Surely there's a better way.

Introducing MIRACL Trust IAM: a user friendly single sign-on access tool built for small and medium businesses. Providing:

✓ Full MFA access without the need for a dongle or mobile device

✓ Templated SSO ready-to-run integrations for many applications

✓ Enforce policies to ensure compliance and security

✓ Fully customisable onboarding and login flows

✓ Self-service or admin user-flows available to minimise support requirement

✓ Configure flows with ease using drag and drop and more

✓ Seamless integration with Azure AD and on-premise domain controller.

✓ Ability to Support for SAML and OIDC to integrate with any third-party applications

BUT WHAT ARE THE BENEFITS OF USING MIRACL TRUST IAM & SSO?

Create better user experiences

Our login can be done via 4 digit PIN or a device-based biometric. As a result, it takes **just two seconds** to login on any device or browser.

Save time

A traditional multi-step, multi- factor authentication login can take 30 seconds. For a 100-person company with five logins a day, switching to MIRACL Trust IAM could help your workforce **reclaim 118 working days a year!**

Meet regulatory compliance

MIRACL Trust IAM meets Secure Customer Authentication standards such as PSD2 and can assist with qualifying for cyber risk insurance.

Free up your IT Helpdesk

An average call to your helpdesk for password reset assistance can range from $15 - $70. With login success rates for MIRACL Trust as high as **99.997%,** you're able to focus on your business rather than wasting resources on insecure passwords.

Increase security

MIRACL Trust IAM is resistant to all remote attacks including phishing, man-in-the-middle, credential stuffing, replay, SMS fatigue and password spraying. Reinforce the security of your business and your users with single-step MFA single-sign on.
