AZURE LANDING ZONE

Azure Landing Zone is the result of a multi-subscription environment focused on Scale, Security, Governance, Networking, and Identity & Access Management. A Landing Zone enables application migration, modernization, and innovation at enterprise-scale in the cloud. They provide a pre-configured foundation for building across the vast ecosystem of the cloud.

Our Azure Architect will conduct a series of workshop covering different design areas of Cloud Platform. We will assess the existing Azure Landing Zone, identify gaps, and provide recommendations based on the Microsoft Cloud Adoption Framework for Azure enterprise-scale landing zone architecture.

BENEFITS

- Security and Compliance
- Performance
- Scalability
- Compliant
- Backup and Disaster Recovery (DR)
- Save Cost with PAYG (Pay-as-you-go)

WHAT WE OFFER

Creating services/resources on any public cloud platform is very easy, however creating them in secure, scalable, and compliant manner, with best practices requires a lot of planning.

Mismo Systems helps you design and build a secure, scalable, and compliant Azure Landing Zones that enables application migration, modernization, and innovation at enterprise-scale.
