

# Smart Facilities

Because Resilient Workplace = Resilient Operations

Enable real-time visibility insights to the facility utilization, asset performance, environment health to ensure robust operations and wellbeing of customers and staff. Provides auditable and on demand IoT data comprising utilities usage – energy, fuel, water, etc., occupant satisfaction plus a wide range of other ESG metrics including carbon footprint.

**Low Cost, SaaS Model**  
(No Upfront Costs)

**Accelerated Time to Value**  
( <1 Week Deployment Cycle)

**Secure & Compliant**  
(HIPPA, GDPR, ISO/IEC 27018)

**Intrusion Free**  
(No intrusion in IT environment)

## USE CASES

### Monitoring

- Energy
- Brightness
- Environment
- Decibel
- Fridge
- Water Temperature
- Air Quality
- Occupancy

### Safety & Hygiene

- Predictive Cleaning
- Open/Shut Indicator
- Smart Smoke Detection
- Universal Contact Tracing
- Leak Detection

### Utilities

- Asset Zoning
- Smart Timestamping
- Smart Waste
- Activity Levels
- Smart Parking
- Touchfree Feedback

## OUTCOMES

↑ **Enhanced occupant experience**

↓ **Upto 25% reduction in operational cost**

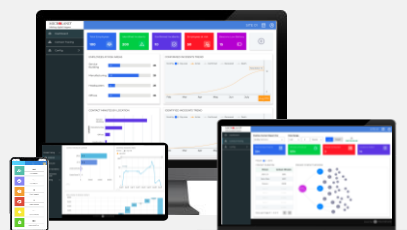

↓ **Reduced downtime in facility operations**

↑ **Increased ESG compliance**

↑ **Upto 20% improvement in operating margin**

↓ **Reduced carbon footprint**

An insightful visual experience of your facility to ensure safety and resilience
