## How is mlytics special?

### Multi CDN management

#### The portal to all your Multi CDN needs

Activate, manage, and optimize multiple CDNs on a single platform, the full Multi CDN stack for your website.

### Website reliability

#### Say goodbye to downtime

Prevent downtime for your website, get your business going and keep your customers happy.

### DDoS protection

#### All layers, always protected

Protect against L3, L4, and L7 DDoS attacks of all sizes effectively without sacrificing performance.

### Stop malicious bots

#### Go home, bad bots

Accurately identify and stop bad bots with mlytics's rich and ever-updating threat database.

### China access

#### Deliver your website to China in one piece

Load your website securely, improve website speed and boost reliability in China.

## How it works?

### Power-Ups

#### Easiest way to shop for the best CDN

Find, activate, and use the best CDNs on a single platform to deliver the best experience for your users.

### AI Load Balancing

#### The fastest route between your website and users

The system will find and intelligently route your users to the best-performing CDN.

### Pulse

#### See CDN performance before you try

See real-time CDN availability and performance data, shop for the best CDN for your website.

### Cloud WAF

#### Protect your website and APIs across the board

Protect against vulnerabilities such as injection attacks, and XSS without changing your website's infrastructure.

### Access control

#### Whitelisting and blacklisting, centralized and simplified

Enables full control over traffic access via CIDR/IP and geolocation attributes.

### SSL

#### Keep website encrypted, get a free SSL

Generate a free SSL certificate and HTTPS-encrypt your website, or upload your own.
