

## Microsoft Defender XDR Policies Review: Optimise your Microsoft Defender XDR deployment with mnemonic's specialised security review service, tailored to enhance efficiency and security.

mnemonic offers a comprehensive security review of your Microsoft Defender XDR setup, providing actionable recommendations to optimise your security policies and alerting workflows. Our experts tailor both Microsoft built-in and custom-made policies to your organisation's risk tolerance, ensuring robust security and reduced false positives. Additionally, we recommend an Intune Security review for customers using Intune for endpoint management.

### Focus Areas

Security policy optimisation

Reduction of false positives

Custom policy creation & tuning

Stakeholder interviews &  
environment review

Optional Intune Security Review

### Approach

Our security specialists conduct a thorough review of your existing Microsoft Defender XDR environment and policies. We start with an initial meeting to set up access and review policies, followed by detailed interviews with customer stakeholders to understand your needs, risk tolerance, and use cases.

This information is used to generate a comprehensive report with weighted recommendations for changes to security policies.

## Microsoft Defender XDR Policies Review: Optimise your Microsoft Defender XDR deployment with mnemonic's specialised security review service, tailored to enhance efficiency and security.

We offer two comprehensive modules:

1.

### Policy Review

Our experts will review your current policies, conduct stakeholder interviews, and provide a detailed report with actionable recommendations to optimise your security setup.

2.

### Implementation Services

We assist in implementing and tuning the recommended policies, ensuring they are aligned with your organisation's risk tolerance and operational needs.

## Outcome

By partnering with mnemonic, customers will achieve an efficient and secure Microsoft Defender XDR deployment. Our service ensures optimised security policies, reduced false positives, and alignment with organisational risk tolerance. Detailed reports and expert implementation support ensure comprehensive improvements and sustained security enhancements.

Our service includes the Policy Review and Implementation Services, providing a complete solution to enhance your Microsoft Defender XDR deployment.

*Those services can be purchased separately.*

## About mnemonic

mnemonic helps customers worldwide protect their assets from advanced cybersecurity threats. As one of Europe's largest dedicated security firms, our team of 350+ specialists tackles complex information security challenges.

Securing your business.
