Drive Your Business Value with Your Data

MobiLab empowers your team to accelerate AI-powered value creation with Axium. Get started with a Proof of Concept (POC) tailored to your specific business needs and funded by Microsoft.

Axium helps you leverage the power of AI to become an information-centric organization.

Axium makes it easier and faster for business users to search for knowledge and data-driven insights **without dependency on domain experts**.

AI-Powered Insights – Provides real-time, actionable intelligence through an intuitive interface.

Ontology & Knowledge Graph – Enables easy modeling and connects with your data sources.

Secured Environment – Grants users access only to the data and information they truly need.

Seamless Data Integration – Integrates with a variety of Cloud and on-premises data sources, including Microsoft Fabric, Azure Databricks, Azure SQL.

Get Started With an Axium PoC

Funded by Microsoft

Axium helps you go from idea to reality with a hands-on PoC that fits your business needs. Our guided process ensures a smooth start, making it easy to see how Axium enhances your data and AI capabilities.

Step 1: Use Case Definition

To ensure a productive PoC, we start with a **kick-off call** with your team to define the scope of the PoC, and **all requirements and details for the 2-day onsite session**.

Step 2: 2-Day Proof of Concept

Our 2-day onsite session is designed to build a bridge between business users and domain experts to empower decision-making. We **equip your team** with the tools and knowledge to collaborate effectively, and create shared understanding.

Over only two days, we **guide you through the process to build a fully functional PoC** based on your own data. We empower you to explore **powerful AI tools.**

Step 3: Roadmap to Success

Based on your first functional prototype, MobiLab supports you to define next steps for **fast value creation and AI adoption**.

Software-Defined Cloud Integration by MobiLab Solutions

MobiLab enables companies to operate with their full data potential, anytime and anywhere.
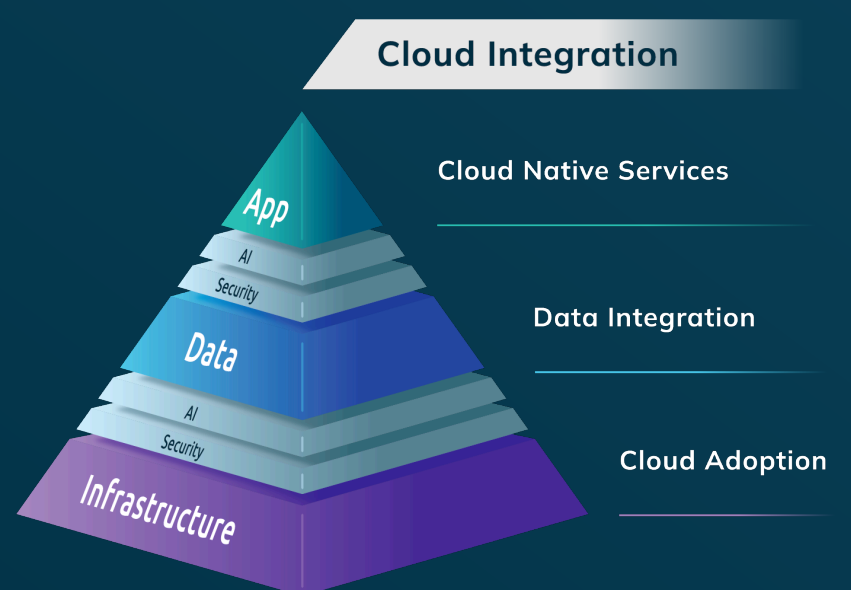

As the pioneer of Software-defined Cloud Integration, we ensure this by supporting our customers on their entire Cloud Transformation journey across all three layers of the stack: Infrastructure, Data, and Application.

Our AI-first approach, combined with engineering excellence and proven templates makes your Cloud Transformation journey easier, faster and at scale.
