

MDM Health Check

Are you getting the most out of your MDM Solution?

For your MDM solution to be effective, it must be setup and configured correctly. A poor setup can leave your company exposed.

MDM Health Check gives you a gap analysis and actionable plan to improve the configuration and performance of your current MDM solution.

Our MDM Health Check service delivers these outcomes:

- ✓ Learn about misconfigurations and security gaps
- ✓ Receive an audit report from a trusted third party
- ✓ Get a detailed plan to tune-up your environment

How it Works

1

Step One
Discover

2

Step Two
Audit

3

Step Three
Report

“Very thorough, very impressive, and very helpful. I like that you summed it all up for us and it is very clear what our next steps are.”

Mike Kinkade
Senior Security Manager
