SmartStart for Intune

Accelerate your Intune deployment

SmartStart™ is a series of workshops to empower you and your team to learn and get off to the best possible start, in a compressed timeframe.

Mobile Mentor has deployed Intune for hundreds of clients around the world and has been recognized for 3 years in row in Microsoft's Partner of the Year awards.

This program is fully endorsed by Microsoft and all your workshops will be recorded so you have reusable assets to go back over the content and to train future employees.

We'll work with you to:

- Conduct an assessment to understand your current endpoint environment
- Learn how to create security policies, device profiles and compliance rules
- Understand how to use Autopilot for zero-touch provisioning of new Windows machines
- Learn how to manage iOS and Android, and secure data on BYO mobile devices
- Create a roadmap and outline logical next steps to accelerate your journey.
