

# 365 Managed Service

Are you getting the full value out of your M365 Investment?

Microsoft 365 is one of the most powerful business platforms available. But most businesses **use less than 50% of what they're licensed for**, while continuing to pay for overlapping tools and manual processes.

The result is **unnecessary cost, inconsistent security**, and an employee experience that **falls short of expectations**.

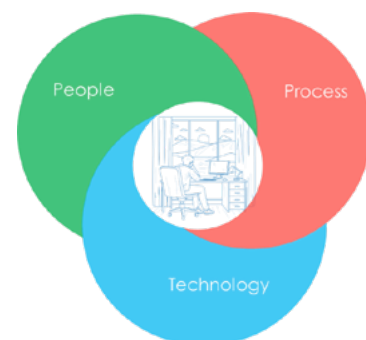

The Microsoft platform is evolving rapidly across **identity, devices, security, and collaboration**. Without dedicated expertise, it is impossible to keep up and follow best practice.

**The 365 Managed Service from Mobile Mentor ensures your business is secure, your employees are productive and you are extracting full value from Microsoft 365.**

The 365 Managed Service was designed for small and medium businesses who have limited IT resources:

- **People feel empowered**
- **Processes are automated**
- **Data is secure**

Mobile Mentor is a global leader, Microsoft partner of the year, and 100% focused on serving customers like you with Microsoft 365.

## What you'll get

- Security best practices
- Zero-touch provisioning
- OS updates & app patching
- 24x7 end user support
- Monthly governance & reporting

## Outcomes you can expect

- More value from M365 licensing
- Fewer overlapping tech tools
- Faster employee onboarding
- Stronger security and governance
- Reduced operational overhead
