Microsoft
Gold Partner

Managing highly sensitive data in the home office age.

- Managing highly sensitive data in the home office age.
- There is often no clear concept for the digital workplace.
- IT is overburdened with the operational effort involved into deploying a modern digital workplace.
- Costs and effort for provisioning and operating a secure-yet user-friendly workplace are too high.
- Processes, technology and staff organisation are not optimally positioned for competition.

CHALLENGES

Legacy solutions usually do not meet security standards and do not fulfil compliance and data protection guidelines.

The IT-department is usually far from being an "early adopter" when it comes to deploying solutions driven by IT consumerisation.

IDEAL SOLUTION

Modern management (smart unified endpoint management) is the prerequisite for the DIGITAL WORKSPACE of the Future.

.

DESIRED OUTCOMES

Mobinergy's expertise in configuring and deploying a modern-managed digital workplace across any device platform, network and application combined with the Exodus™ migration tool creates a unique value proposition.

Mobinergy
Your partner in the Digital Workspace

Mobinergy is a leading European consulting company for Unified Endpoint and Identity Management.

We are introducing the digital workplace to make every employee, on every device, with every app and at every location more productive and secure than ever before.

With a presence in the UK, France and Germany, we strive to speak our customers' language.

INCREASE PRODUCTIVITY AND LOYALTY

A mobile workplace increases in the long term employee productivity and loyalty towards the employer in the long term.

Accessing company data at any time, from anywhere, via any network, and with any end-device, in a secure manner, is a key component of the digital workplace.

MODERN WORKPLACE DEPLOYMENT

Digital working must be accompanied by targeted measures for security of your company data.

We support you in all facets of the mobile digital workplace and provide you with in-depth insights into innovative software solutions, to enable your path into the digital working world quickly and efficiently.

ZERO TRUST- ZERO TOUCH

Out-of-the box device deployment, passwordless authentication and continuous access monitoring are the key ingredients of an effective Zero Trust – Zero Touch strategy.

We will help you deploy devices, applications, control their accesses and simplify authentication across the board.

Migration to the future Digital Workplace with Exodus™ - managed via Microsoft Endpoint Manager "from where you are to where you want to be"

Our expertise in the field of Unified Endpoint Management and Identity and Access Management is based on 10 years experience in deploying the Zero Trust Digital Workplace with 1000+ customers in EMEA.

We deploy an enterprise-secure yet user friendly Digital Workplace managed by Microsoft Endpoint Manager - Intune.

Our 360° services portfolio includes: Design, Build, Train, Run and Service.

To simplify and accelerate your migration, our Exodus SaaS solution will seamlessly migrate iOS and Android devices from your current UEM to Microsoft Endpoint Manager (Intune).

m + **Exodus** + **Microsoft Endpoint Manager**

Expertise in deploying and managing all device platforms as well as securing access to corporate resources	SaaS tool for seamless migration of iOS and Android device from any UEM to Microsoft Endpoint Manager	Best-in-class Unified Endpoint Management (UEM) solution hosted in Azure and fully integrated with the O365 stack

PREPARE AND CONFIGURE MICROSOFT ENDPOINT MANAGER

Set-up enrolment policies, create security policies, configure application deployment, set compliance policies, enable conditional access to prepare the deployment of iOS, Android, macOS and Windows 10.

PERFORM SEAMLESS DEVICE MIGRATION WITH EXODUS

Configure Exodus to migrate devices from your source UEM to the target Microsoft Endpoint Manager instance. Reduces migration time per user/device, number of support cases, and ensures no devices are lost during the migration.

KEEP YOU UP-TO-DATE WITH LATEST DEVICE PLATFORM UPDATES AND SECURITY CONSIDERATIONS

Once your device fleet is migrated to Microsoft Endpoint Manager, we will support you in the deployment of additional mobile and digital workplace use cases and ensure you are staying ahead of the curve.

.

Generali: Microsoft Endpoint Manager -Intune

We support Generali move from a legacy desktop management to a modern management and deploying 5000 devices in 3 months .

Mobinergy deployed Microsoft Intune with Autopilot for Out-of-the-box deployment of Windows 10 laptops shipped to the end user directly.

Mobinergy assisted in ensuring complete security and regulatory compliance.

Considering the highly regulated insurance industry, these items were of key importance to the project's success.

SIMPLIFIED DEPLOYMENT

Transition from legacy-managed „ThinClient/CITRIX & SCCM" to modern-managed „WTS-Notebook/CITRIX & Intune".

Out-of-the-box deployment with Autopilot

MODERN APPLICATION MANAGEMENT

Factory provisioning of Windows 10 devices and over-the-air deployment of OS and applications updates.

LATEST SECURITY BASELINES

Conditional access to Office 365 and on-premise resources.

Latest security baselines to meet the highly regulated security requirements of the financial industry.
