One platform. Any AI agent. Governed from day one.

AI / AZURE

ENTERPRISE

WHY AI INITIATIVES STALL AT SCALE

- ✓ 62% of organizations cite security & key management as their #1 AI deployment blocker.
- ✓ 71% of enterprises cannot track AI consumption, enforce quotas, or attribute costs by team.
- ✓ 47% require explicit guardrails before deploying autonomous agents in production.

HOW FOUNDRY CITADEL SOLVES THIS

- 01 Citadel Governance Hub**
One central control point for all your AI. Manages who accesses what, at what cost, with full security.
- 02 Citadel Agents Spoke**
A ready-to-deploy environment for each team to build and run AI agents — pre-configured and consistent.
- 03 Universal AI Registry**
A catalogue of approved AI models and tools with automatic per-team usage tracking and cost attribution.

Two components. One governed platform.

CITADEL GOVERNANCE HUB

Governance & Security

WHAT IT SOLVES

Decentralized AI governance, unpredictable costs, and security vulnerabilities blocking AI at scale.

AZURE APIM | AIFOUNDRY | CONTENT SAFETY

WHAT IT DELIVERS

Controlled AI access · Zero standing credentials · Data protection · Safety filters · Full model governance.

CITADEL AGENTS SPOKE

Observability & AI Velocity

WHAT IT SOLVES

Agent sprawl. No visibility into cost, quality, or compliance across business units.

AZURE MONITOR | API CENTER | AI FOUNDRY

WHAT IT DELIVERS

Track AI spend by team · Evaluate agent quality · Log every interaction · Launch new agents faster.

Standards Built In

Pre-configured to CAF and WAF standards.

Ship AI Faster

Pre-built templates and blueprints to accelerate every deployment.

Secure by design

Sovereign cloud · Entra ID · RBAC · Audit controls.
