

## CASE STUDY

# Insurance Company

Framework Migrations, Code Quality Improvements, Impact Analysis

### Overview

A mid-sized US insurance company struggled to maintain feature development output when large migrations or security remediations were required. With Moderne, this insurance company increased development productivity on all fronts — and changed the way they value code maintenance and migration.

# 20M

### RESULTS

#### Automated Code Maintenance

Updated code across all repositories and issued PRs in one day for the Spring Boot 3.x upgrade.

#### Streamlined Migration Efforts

Significantly reduced the time developers had to spend on migration efforts—particularly for senior developers.

#### Comprehensive Codebase Visibility

Gained comprehensive, accurate visibility into their codebase that is actionable through automation.
