Reinventing how organisations manage and govern application access

Apporetum is a cloud-based product that makes it easy to manage user access to all applications and resources within your organisation.

Apporetum

Benefits

INCREASED EFFICIENCY
Ability to self-service & delegate access management.

IMPROVED COLLABORATION
Seamlessly manage access for external partners (B2B users).

IMPROVED SECURITY POSTURE
Proactively control access with increased visibility & reduced over-provisioning.

BETTER RESPONSE AND RECOVERY
Reduce incident response & recovery times for security incidents.

IMPROVED GOVERNANCE
Reduce ad-hoc processes & risky workarounds by providing a single pane of glass for SecOps teams.

INCREASED COMPLIANCE
Implement legal & regulatory assurance frameworks on application access & usage.
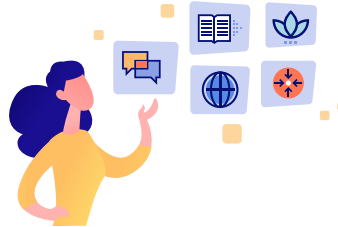

Key Features

For Identity Managers

SETUP CONTROLS

Get visibility of user access across the ICT ecosystem in a central place.

Support app owners to seamlessly comply with Information Security policies.

Ensure app owners meet their governance obligations.
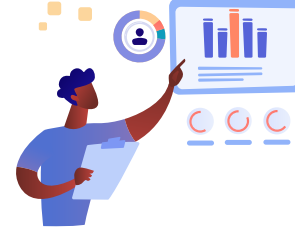

For Application Owners

MANAGE USER ACCESS

Grant and remove access to applications (self-service) in real-time.

On-board both internal & trusted external users in a secure manner.

Have more control & visibility of user access across all their managed apps.

For SecOps Teams

MONITOR & RESPOND

Detect and respond to abnormal application access patterns.

Identify access given outside of approved processes and take action early.

Easily suspend/restore access of third party suppliers when they experience cyber incidents.

✓ **Simple and intuitive**
User-friendly interface that can be used by non-technical people.

✓ **Rapid & flexible deployment**
Multiple options to deploy based on the organisation's security ecosystem.

✓ **Easy transition to service**
Quickly establish or augment business processes.

✓ **Progressive adoption**
Start extracting value immediately by onboarding apps using a staged approach.
