

# Your Internal Developer Platform

# Today there are major **challenges** to development operations

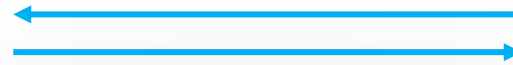

## Dev

- Dependent on DevOps support
- Lack of infrastructure know-how
- Lack of ownership

## Ops

- High support workload
- Complex tools & costs
- Difficult governance

„Over-the-fence“  
operations  
frustrate, cost  
time and money

- Results in slow and infrequent deployments
- Time and money wasted on error handling and disaster recovery
- Slower innovation cycles and longer time-to-market

# The future

**Turn today's infrastructure challenges into powerful platform operations.**

**mogenius is an internal Developer Platform that orchestrates infrastructure resources and automates workflows.**

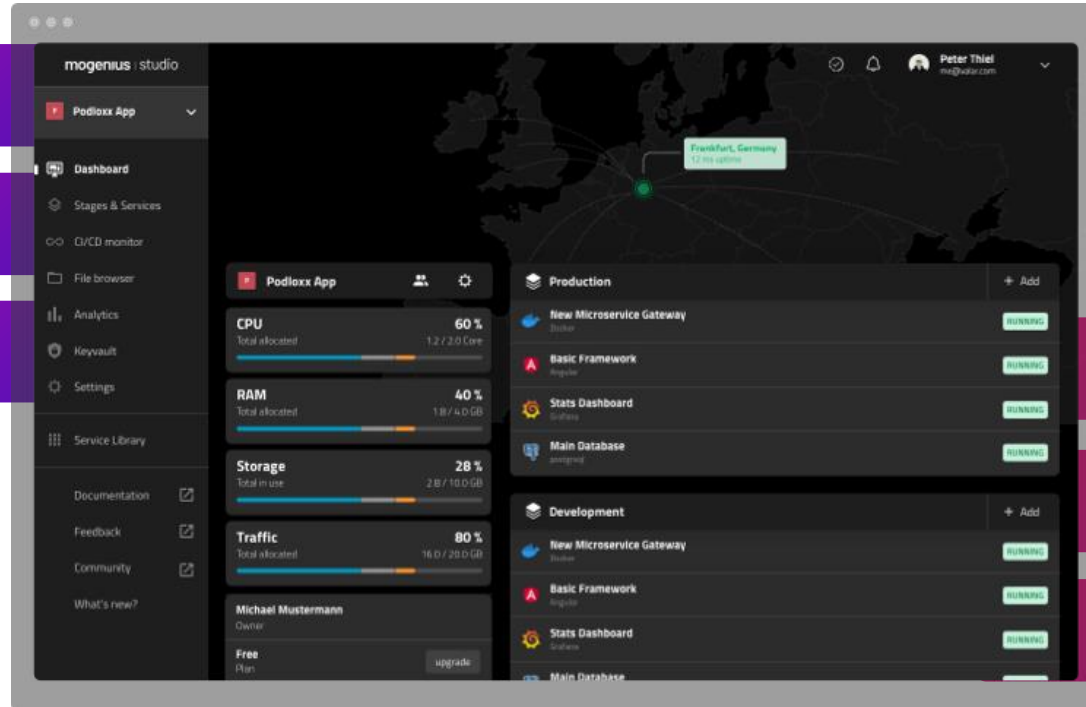

# Increase productivity with process automation

Intuitive developer experience

Faster deployments

Kubernetes self-service

# Ops

Reduced workload

Easy multi-cloud setup

Better Governance

# Dev

Up to **80** %

Less DevOps support effort

The mogenuis Internal Developer Platform orchestrates resources and automates tasks

# Teams increase productivity with faster deployments

## Without mogenius

Tasks e.g.: Cloud resource provisioning, Kubernetes setup, access management, pipeline configurations, deployments

## With mogenius

● Manual tasks ● Automated tasks ● Time for development

Time and cost savings for a development team of 50 Devs

# Get started in 3 simple steps

## Step 1

- Connect mogenius to Kubernetes Cluster

## Step 2

- Install mogenius operator via Helm Chart

## Step 3

- Create projects on Internal Developer Platform
- Invite team members
- Start deploying

# Our subscription model

## Professional

- Internal Developer Platform
- Single cloud
- 1 Project
- 1 Cluster
- Unlimited workloads
- Unlimited users
- Kubernetes Self-service
- CI/CD
- Security features
- Template library
- Logs, metrics and monitoring
- Support: E-Mail

---

**Starting at 950,- / month**

## Enterprise

- Internal Developer Platform
- Multi-cloud / on-premise
- Multiple projects
- Multiple clusters
- Unlimited workloads
- Unlimited users
- Kubernetes Self-service
- CI/CD
- Security features
- Custom library
- Logs, metrics and monitoring
- Support: E-Mail, Slack
- SLA

---

**Starting at 2.500,- / month**
