Smart Building

Complete the experience with the right equipment for each space

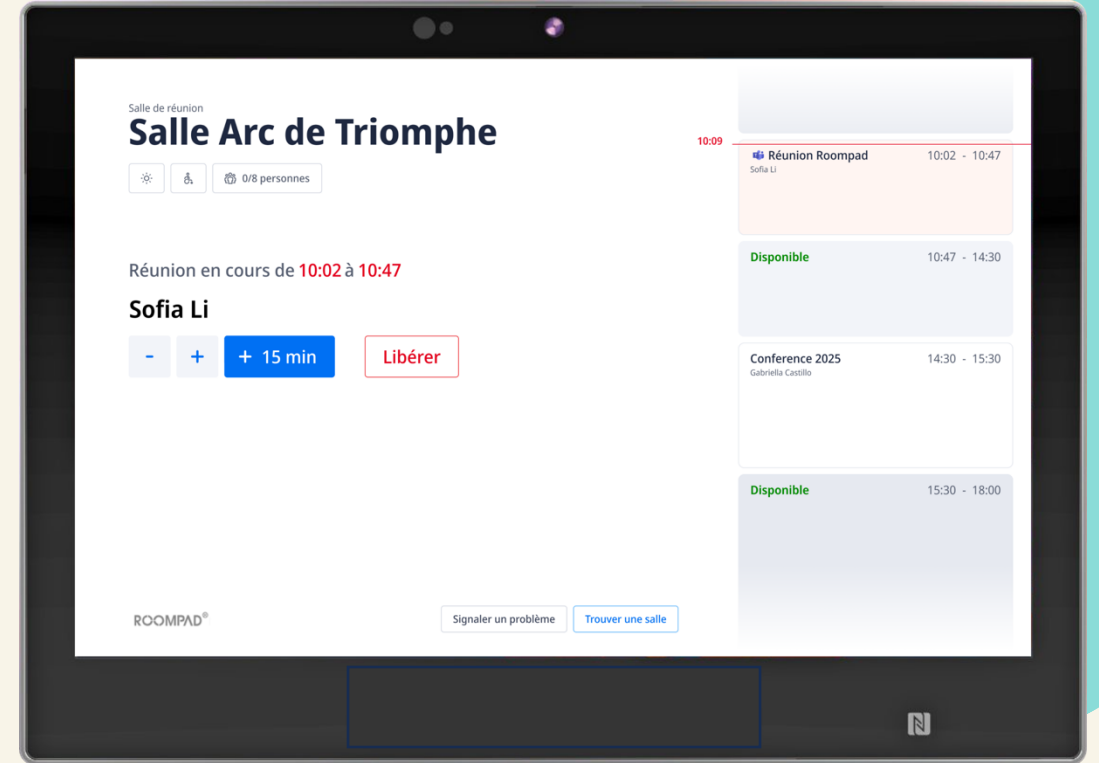

RoomPad: Book your rooms on tablets and take advantage of additional features

Key features

- > **Instant room reservation** on the fly via an intuitive touch interface.
- > **Simplified management** of reservations with confirmation, cancellation or extension.
- > **Fast authentication** with universal badge reader (Mifare/HID) to authenticate.

Additional features

- > **Reporting problems** from the room right to the ticketing tools.
- > **Digital signage** of corporate news when no reservations to display
- > **View maps** to find available rooms on a specific floor or in the building and how to get there.

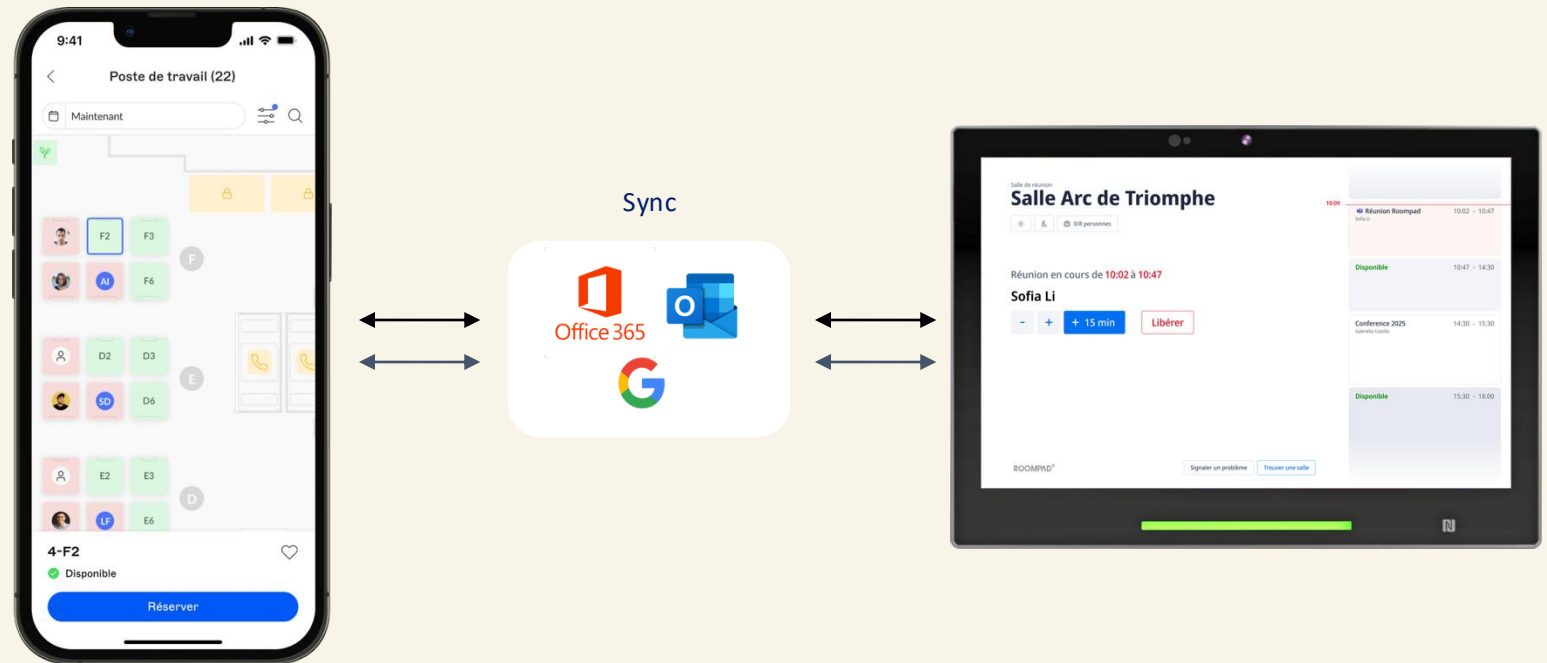

Booking with the Outlook add-in

- > **Viewing rooms** available for a selected time slot in sync with the Witco app.
- > **Possibility to filter on:**
 - > capacity,
 - > floor,
 - > associated equipment.
- > **Requesting additional services** when booking a meeting room.
- > **Inviting external visitors** and triggering a specific workflow.
- > **Instant sync** of the information with the Workplace app and RoomPad devices.

The screenshot shows the Outlook add-in interface for booking a meeting room. The top bar includes a search bar and a menu with options like 'Fichier', 'Réunion', 'Assistant Planification', 'Insertion', 'Format du texte', 'Révision', and 'Aide'. Below the menu is a toolbar with icons for 'Actions', 'Réunion Teams', 'Select Room', 'Envoyer à OneNote', 'Participants', 'Options', 'Indicateurs', 'Dicter', 'Toutes les applications', 'Lecteur immersif', and 'Nouveau sondage de disponibilité'. The main content area is titled 'Vous n'avez pas encore envoyé l'invitation à cette réunion.' and contains a form for sending an invitation. The form includes fields for 'Titre', 'Obligatoire', 'Facultatif', 'Heure de début', 'Heure de fin', 'Emplacement', and 'Recherche de salles'. Below the form, there is a section for 'Microsoft Teams' with a link to 'Rejoignez la réunion maintenant' and the meeting ID and secret. On the right side, there is a sidebar with tabs for 'Salles de réunion', 'Services', and 'Visiteurs'. The 'Salles de réunion' tab is active, showing a search bar and a list of rooms. The list includes 'Salle Mars' and 'Salle Marie Curie', each with details like location, capacity, and a 'Sélectionner' button.

Create an interconnected environment between RoomPad and mobile application

- > **Instant booking** of rooms or desks via RoomPad or the mobile app.
- > **Booking sync** on all media thanks to the interop with O365 or Google.
- > **Booking confirmation** on the interactive room panel.

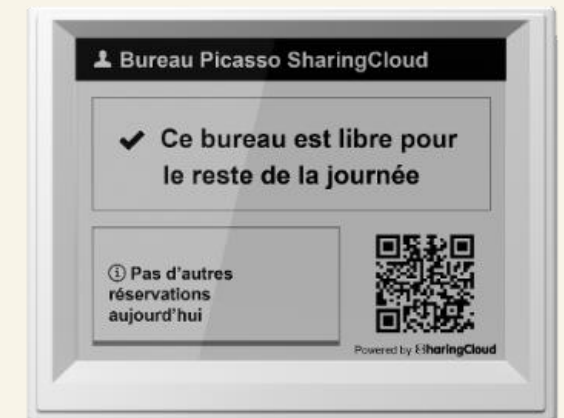

Low Tech digital signage for your desks

Key features

- > 4.3" connected e-ink label: display in three colors (black, red, white).
- > 5-year battery life: battery operated (replaceable standard button cell).
- > 2.4 GHz band radio access points: can be dedicated or integrated into your Wi-Fi terminals in the form of a USB dongle.
- > Wireless operation: simple and fast deployment, centralized management in a SaaS environment.

Operation with the mobile app

- > Reservation and management of desks and meeting rooms via the app.
- > Automatic sync of reservation information with each DeskTag.

The interactive kiosk to find your way around the floors

- > **Map on a large touchscreen** to visualize the floor map and help employees (or external visitors) find their way.
- > **Real-time status display** of resources to quickly find an available room, for example.
- > **Search functionality** to quickly locate a space, a point of interest or colleagues with help of their desk reservation.
- > **Digital signage** when the map is not in use.
- > **Located at strategic passageways.**

> Example of interactive kiosk

Broadcast your content everywhere in the workplace with our digital signage solutions

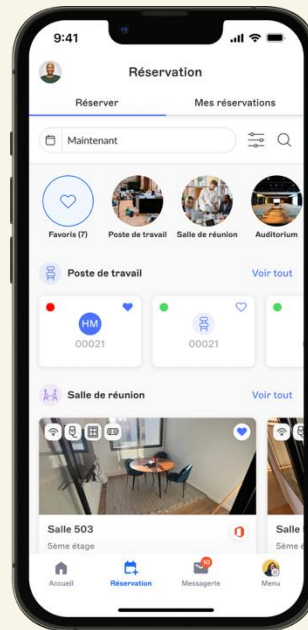

- > **Broadcasting rich content** such as news, traffic news, digital art... on many media, with a resolution of 4K.
- > **On screens installed in various strategic locations** (reception, canteen, elevator exits, etc.).
- > **Centralizing content management** with numerous advanced templates and playlists.
- > **On dedicated screens or not** — for example, tablets by the doors of meeting rooms can stream content when not in use.

> Content management interface

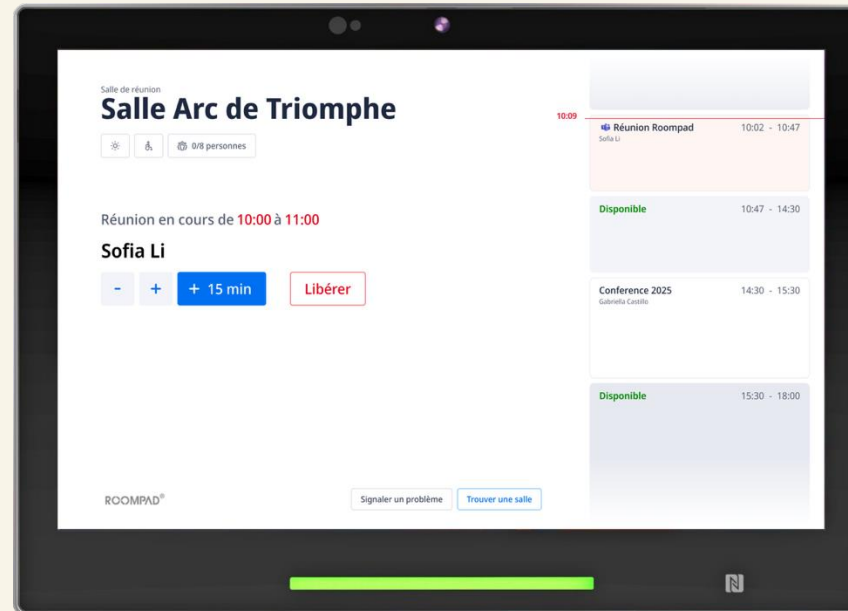

Example of an end-to-end journey (1/2)

J-1
Room
reservation

- ✓ Sofia reserves a room for her team meeting the next day.
- ✓ In a few clicks, she finds the space corresponding to her needs (location, size, equipment)

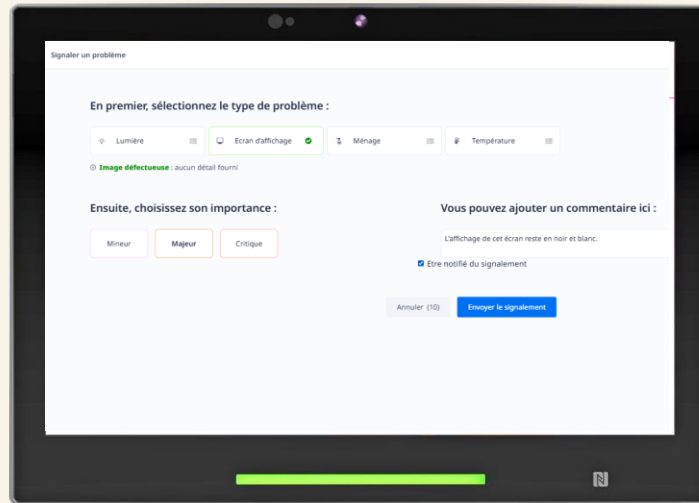

J0 - 10:00
Booking
confirmation

- ✓ The room panel shows all the reservation information.
- ✓ This makes it easy for all participants to identify the right room.

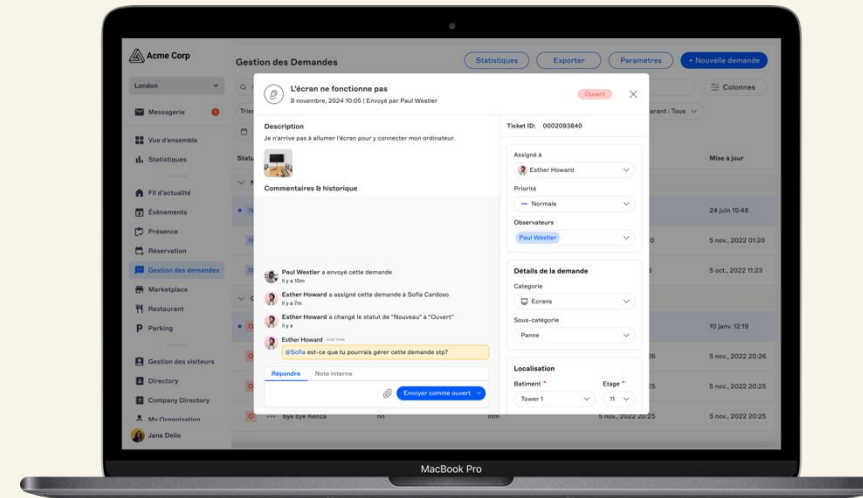

Example of an end-to-end journey (2/2)

10:07
Reporting
a problem

- ✓ In a few clicks, a colleague of Sofia reports that the screen seems out of order.
- ✓ The information is sent directly to the CMMS.

10:10
Response
for technical assistance

- ✓ 5 minutes later, the facility manager sends a technician to solve the problem.
- ✓ Ticket status is updated in the CMMS to keep everyone well informed.

For managers

Provision of statistics to better manage your resources and spaces

Booking statistics

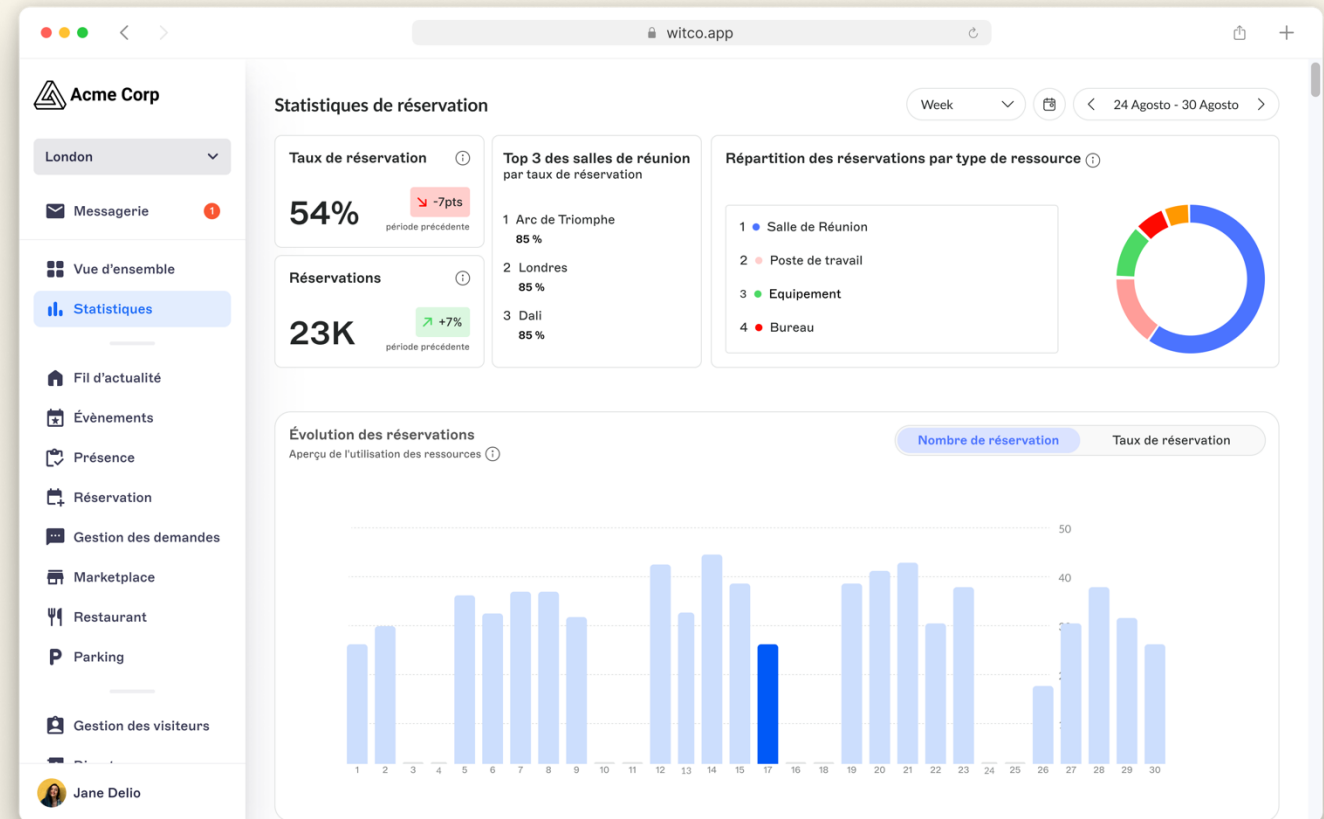

The app helps you anticipate needs and better manage your spaces, with real-time data on the use of resources.

Satisfaction assessment

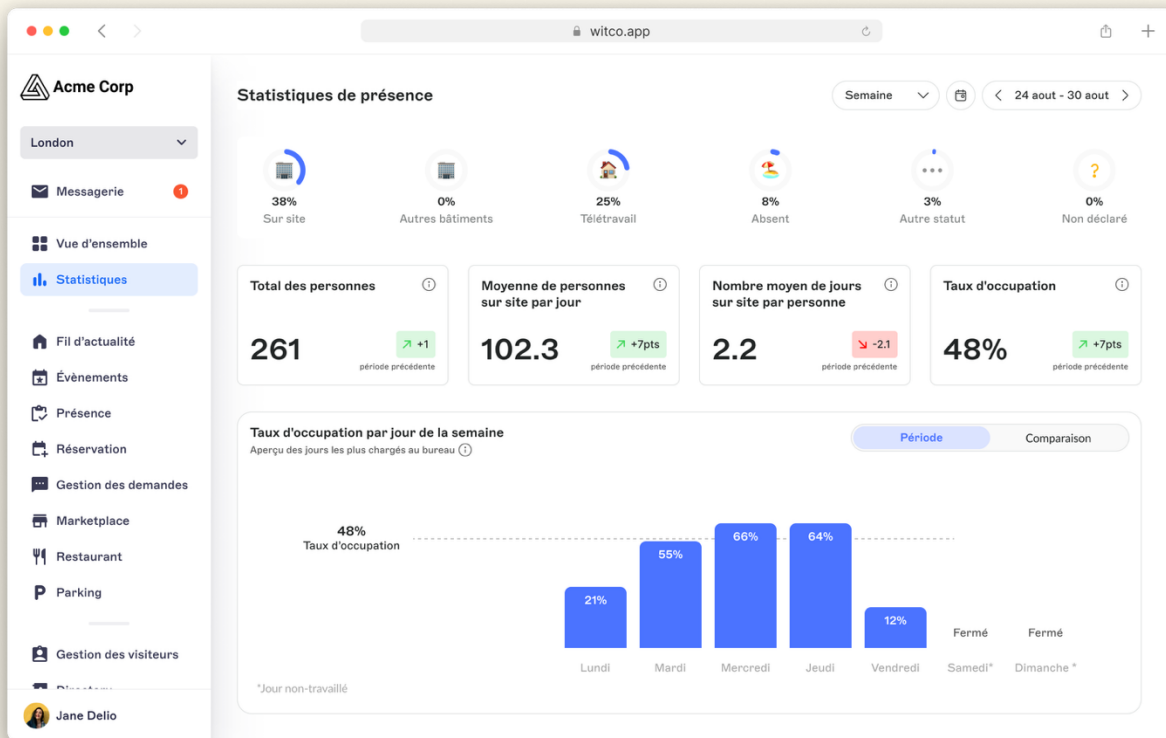

With the app, you can measure the satisfaction of employees with services through surveys and instant evaluations.

Open API and export

Witco provides APIs to connect your tools to our platform. Data can also be exported for internal use.

HR management: monitor the presence data of your employees

Manage your remote work policy

Define in a few clicks the rules of presence on site (declaration of attendance, typical week...) and the rules to access resources (i.e. reservation by zone).

Optimize the use of your resources

Thanks to the various data collected (presence on site, reservation rate,...), make the best use of your spaces and resources.

Sync with all HRIS

Attendance declarations can be synced directly with your HRIS and then displayed in the Witco app.

Incident requests and responses management

Easy reporting

- > Employees can report an incident from the Witco app, a tablet or by scanning the room's QR Code. The form allows you to fill in the details of the incident (subject of the request, location, emergency...) in a few clicks.
- > The incident can then be seen in the manager interface of the Witco app, for quick and easy management and prioritization.

Interconnection with CMMS

- > For buildings that are equipped with a CMMS, requests can be sent directly to it, which then makes it possible to automate ticket tracking.
- > The person who reported the incident can check the ticket status at all times.
