

**Cybersecurity  
is a Mindset,  
Not a Checkbox.**

## The Good, the Bad, and the Ugly

In today's dynamic workplace, employees share substantial amounts of sensitive data across the **Microsoft 365** platform through Teams, OneDrive, and SharePoint, heightening the risk of data leaks, compliance violations, and cyberattacks.

### Why Things Go Wrong

69%

**69% of employees** intentionally bypassed cybersecurity guidance in the last 12 months  
– Gartner 2024

#### ✗ No Clear Guidance

Employees lack effective governance practices for Microsoft 365, leaving them unprepared for secure collaboration.

#### ✗ Overburdened IT and Security Teams

IT and security teams struggle to protect the organization without business context, making siloed efforts ineffective.

#### ✗ Limited Awareness Programs

Traditional training fails to effectively engage employees or encourage real behavioral change, leading to a lack of awareness regarding their shared responsibilities.

# WeActis\*

by Mondata

## We Join Forces: Turning Employees into Power-Teams

We believe employees are not the weakest link—they're the key to stronger defenses. By fostering secure cyber judgment and engaging employees with a positive, action-oriented approach, we transform them into active contributors.

### Collective Risk Management

We shift from centralized risk management to collective responsibility, reducing the workload on IT and security teams.

## Act Decisively: Seamless Actions, Real Results

WeActis integrates directly into Microsoft Teams, creating frictionless and measurable improvements in employee behavior.

### Key Features

#### Simple Metrics

Our solution profiles and analyzes risks, empowering employees to act with targeted, frictionless actions.

#### Positive Nudges

Prompts within Teams raise awareness and guide immediate actions, making security effortless.

#### Real-Time Feedback

Actionable advice helps employees reduce risks in less than five minutes weekly.

## Is - Information Security: As Part of Your Culture

A Cybersecurity Resilience Culture is making security a seamless part of every workflow:

> Strengthen  
Data Hygiene

> De-Risk AI  
Adoption

> Enable Real-Time  
Guidance

> Enhance Risk  
Factor Insights

> Streamline Risk  
Reduction

By 2026, enterprises combining GenAI with a security behavior and culture program will experience **40% less** employee-driven cybersecurity incidents.

– Gartner 2024
