COPILOT FOR MICROSOFT 365: 3 DISCOVERY WORKSHOPS

Discover Copilot for Microsoft 365 - your AI-powered productivity ally. Seamlessly integrated with Microsoft 365 apps, it assists you in drafting emails, creating documents, and collaborating effectively.

Learn how you can get your organization ready to effectively and safely adopt the latest generative AI solution within your Microsoft 365 environment. Designed as interactive sessions in non-technical jargon, your Executive Management can get involved in developing your Copilot strategy and roadmap.

Learn about what's possible with Copilot

We will explain the way the Microsoft Copilot brings interesting productivity gains and work experience enhancements for different job roles and how it can help evolve the way we work.

Get your content ready for Copilot

We will assess your current information governance and advise you on how to manage your content effectively and securely.

Understand the key technical requirements

We will establish clarity on what you need to get your technical stack ready for optimal results with Copilot.

Ensure secure and compliant handling of your data

We will review your data governance requirements and show you how to leverage Microsoft 365 to improve your company-wide security and compliance concept in tandem with Copilot 365.

Engage your organization to draw value from Copilot

We will design a strategy to introduce and use Copilot smoothly for different personas in your organization. With a comprehensive adoption management program.

MONDAY COFFEE

Addressed target groups: Representatives from Executive Management, IT Management and Legal.

Workshop deliverables: Understanding of what is possible and desirable in the area of 'modern work'. An elaborated strategy and roadmap suitable for your specific needs.
