

# Monitorpack reporting dashboards now available in Microsoft AppSource

France, May 24, 2025 - Monitorpack, a European software and consulting company specializing in proactive IT infrastructure monitoring and reporting for Microsoft-centric environments, today announced the availability of [Cloud Portal offer](#), an online cloud marketplace providing tailored line-of-business solutions.

Monitorpack delivers high-performance, agentless monitoring tools designed to ensure IT infrastructure continuity and reduce the operational burden on IT teams. With native integration to Microsoft SQL Server Reporting Services (SSRS) and Microsoft Power BI, Monitorpack Reporting Dashboards offer customers real-time visibility of performance, service health, event logs, and other vital infrastructure components, all without the need for complex deployment or custom agents.

“We created Monitorpack to help IT teams stay ahead of incidents by combining simplicity, automation, and deep integration with the Microsoft ecosystem,” said Olivier Manach, CEO at Monitorpack. “By making our Reporting Dashboards available in Microsoft AppSource, we are giving customers a scalable, secure, and fast way to improve their operational resilience with the tools they already trust.”

“Monitorpack is fully integrated with Microsoft’s native authentication and security model, leveraging Microsoft Entra ID identities to enhance protection while enabling direct access to reports via a standard Microsoft account,” said Olivier Manach.

**Jason Graefe**

CVP, ISV & Digital Natives, Microsoft

*“Microsoft welcomes Monitorpack Reporting Dashboards to AppSource, where global customers find thousands of line-of-business partner solutions that work with the Microsoft products they already use,” said Jason Graefe, CVP, WW ISV and Digital Natives team at Microsoft. “AppSource and trusted partners like Monitorpack help customers do more with less by increasing efficiency, buying confidently, and spending smarter.”*

## About Monitorpack

Monitorpack is a European software vendor dedicated to delivering intuitive, high-efficiency IT monitoring and reporting tools for Microsoft environments. Designed for CIOs, system administrators, and IT operations teams, Monitorpack solutions provide comprehensive visibility across cloud, on-premises, and hybrid infrastructures. With thousands of assets monitored daily across Europe, Monitorpack ensures organizations can react faster, reduce downtime, and streamline compliance reporting with native SSRS and Power BI dashboards.
