AUTOMATICALLY TAKE A SCREENSHOT EVERY 5 MINUTES

The screenshot displays the MONITUP dashboard interface. On the left is a dark sidebar with the MONITUP logo and a list of navigation items: Dashboard, PC List, PC Groups, PC Performances, Open/Close Time List, Task Manager Details, Screenshot, Web Sites, Freelance Works, Reports, Settings, Payment List, and Download App. The main content area is titled 'Screen Shot' and features a date filter set to '22.08.2022' and a 'Filter' button. Below this is a table with columns for 'PC Name', 'Group Name', and 'Passive/Active'. The table lists two groups: 'Factory' (Passive) and 'Purchasing' (Active). Below the table is a grid of 18 screenshots arranged in 3 rows and 6 columns. Each screenshot is labeled with a timestamp. The timestamps are: Row 1: 18:24, 18:18, 18:13, 18:08, 18:03, 17:59; Row 2: 17:53, 17:48, 17:43, 17:38, 17:33, 17:28; Row 3: 17:23, 17:18, 17:13, 17:08, 17:03, 16:58. The screenshots show various web applications, including a dashboard with charts, a product catalog, a task manager, and a payment list.

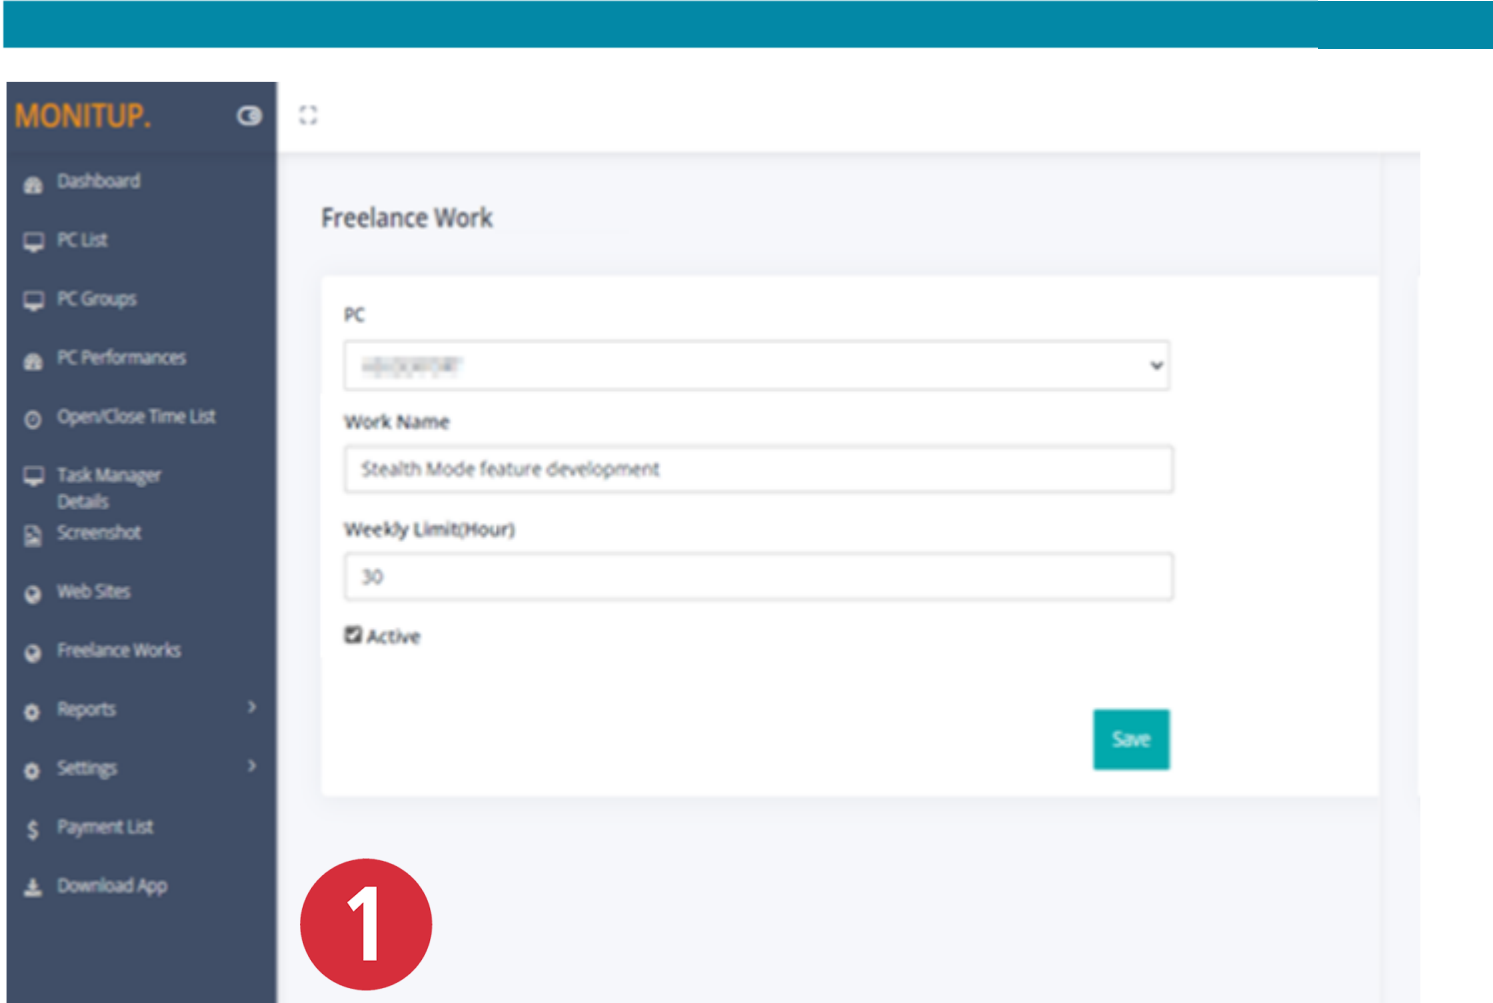

PC Name	Group Name	Passive/Active

YOU CAN SEPARATE APPLICATIONS INTO 3 DIFFERENT CATEGORIES AS PRODUCTIVE, UNPRODUCTIVE AND NEUTRAL

The screenshot displays the MONITUP application interface. On the left is a dark sidebar with navigation links: Dashboard, PC List, PC Groups, PC Performances, Open/Close Time List, Task Manager Details, Screenshot, Web Sites, Freelance Works, Reports, Settings, Payment List, and Download App. The main area shows a date range from 08.07.2022 to 08.10.2022 with a Filter button. Below this are three sections: Productive Applications (green header), Unproductive Applications (orange header), and Neutral Applications (grey header). Each section contains a grid of application icons, names, and time durations. A 'Change status' dropdown menu is present in each section, currently set to 'neutral apps', with a 'Confirm' button.

Excellent Product

Extremely happy with this product. It is very effective at monitoring activity and providing screenshot when required.

Creator is super helpful and the product was very easy to install.

I highly recommend this product.

Great for employee monitoring.

I'm not a great fan of a total control, but in some cases I need to have an overview of employee activity.

Initially, this offer included only one user but the developer was kind enough and included 5 users per code.

Monitup is very easy to use. As admin, you can check browser history (only the tab name aka website + page name but no link to the webpage), Ram and CPU usage, statistics like productive and non-productive apps, screenshots (pixelated to prevent personal data to be seen). Also you can check when the PC was turned on and off.

Overall very great deal for the price and great support.

Funciona muy bien

Tiene una interfaz muy fácil de utilizar y la información obtenida es de mucha utilidad para tomar medir el rendimiento de los empleados.

Es importante mencionar que por protección de datos las capturas de pantalla son en baja definición, por lo que no podrás ver con exactitud la información de esta, pero si no tienes bloqueados sitios web y aplicaciones te servirá para darte una idea de en qué sitios entran.

Recomendado.

I really happy with monitup

It's a very good software for monitoring employee jobs, and follow their work to see if they have fulfilled their stated objectives. It saved me a lot of administrative time, and increase the overall quality of work of the whole organization. This period is still just the beginning of MonitUp, I strongly believe that they will continue to develop software and functions and meet the needs of organizations of all types of businesses. Anyone looking for a software Software for tracking the work of subordinates or teams. Don't hesitate. Monitup is your answer.

It saved me a lot of administrative time

This is a FANTASTIC productivity tool.

MacroDave PLUS MEMBER ✓ Verified Purchaser

Great PC usage monitor. Also a really good productivity tool

I have had this on my PC for about a week now. I wish we could upload images to these reviews so you could see my charts. I am glad that 67.4% of my usage has been on Chrome, I do a LOT of work in the browser. Read, write, analyze, etc. 23.8% of my usage otoh is on Discord. and while I LOVE my homies on Discord-Henrys and Kens servers, Robomotions, etc. the reality is that 23.8% is a LOT.

Anyways my point is not to tell you how much time I spend socializing, but to say that you can monitor employees with Monitup, and it would be a great choice, but you can also monitor yourself. This is a FANTASTIC productivity tool. I can see what I am doing right and wrong, and I can't lie to myself consciously or subconsciously. The numbers don't like yo.

Anyways I also did a short experiment with a cousin/nephew (my cousin's kid calls me uncle) and let him use my other laptop for a while. Well not a surprise but if you want to see how people use a computer-he spent over 90 minutes watching the type of truck related content an 8 yr old boy would watch.

But if you want to see what people are doing, in a boss way, parent way, in a usage testing way, or in a productivity way, then MonitUp is for you. Honestly I kind of bought this on a whim, and a week into using it I am more than satisfied with my purchase and look forward to being both more efficient with my work AND being able to see what other people do on my machines.
