

**Start your journey now
with Copilot 365**

Copilot 365

Microsoft 365 Copilot is an artificial intelligence-based productivity tool that promises to revolutionize the way we work. Using Large Language Models and integrating data with Microsoft Graph and Microsoft 365 applications, Copilot can generate drafts, suggestions, visualizations, and notes based on users' words and data. Copilot works with major Microsoft 365 applications such as Word, Excel, PowerPoint, Outlook, and Teams, offering personalized suggestions, automatically generated content, analysis tools, and advanced features. Microsoft Copilot 365 learns from users' preferences, habits and goals to help them work more productively and effectively.

Workshop | POC | Data Governance | Licensing | Advisory

Our overall offer

Workshop

With this workshop, we provide a comprehensive overview of Microsoft 365 Copilot, with numerous product demos, and Microsoft's approach to responsible Artificial Intelligence in general.

Structured in three sections, the workshop on Copilot for Microsoft 365 is designed to assist customers in analyzing their needs, prioritizing Copilot adoption scenarios, and defining an actionable roadmap.

THE THREE SECTIONS OF THE WORKSHOP

Assess: the initial phase introduces the workshop, providing details on the technical requirements of Copilot for Microsoft 365 and outlining the steps needed to prepare for AI integration.

Art of the Possible: this section, consisting of presentations and demonstrations, aims to educate your organization on transforming the employee experience through artificial intelligence integrated into Microsoft 365.

Build the Plan: during this phase, we define and prioritize key scenarios to focus on. We also develop a detailed plan to design and implement Copilot experiences for Microsoft 365 in your organization.

DURATION AND PRICES

2 sessions of 3 hours each / 1,500 CHF

Proof of Concept

This service is designed for customers who wish to explore, test and evaluate the potential use cases and value of Copilot 365 in their specific context.

At the end of this service, the customer will have a clear understanding of how Microsoft 365 Copilot can maximize their business potential and achieve unprecedented results.

Possible integrations with other business tools (e.g., Power Platform) can be made in this offering.

DURATION AND PRICES

To be arranged according to your needs.

Data Governance

Our Data Governance service is designed to provide enterprise information management and protection solutions on the Microsoft 365 platform. With a tailored approach, our offering aims to ensure effective data governance by providing customized tools to meet the specific needs of companies.

We will assist you in implementing security and data management solutions that seamlessly integrate with the Microsoft 365 environment, ensuring regulatory compliance and the security of your information and data.

LEVELS OF SERVICE

Bronze: offers an access review, performing a single check of access permissions to various content and resources on SharePoint. It also standardizes permissions into groups based on Microsoft 365, simplifying future reviews.

Silver: includes periodic review of access, ensuring regular monitoring of access permissions. It also introduces sensitivity labels, labels that classify content according to its level of confidentiality and enforce appropriate security rules.

Gold: includes all the services of the Silver package, while also adding two advanced features: data loss prevention (DLP), a system that protects sensitive data from loss or theft, and retention, a policy that determines how long content should be retained or deleted in accordance with current regulations or business needs.

Custom: Tailor-made offer, customized to meet individual customer needs.

DURATION AND PRICES

1 day assessment at your site to assess the level of service you need / 1,200 CHF

Licensing

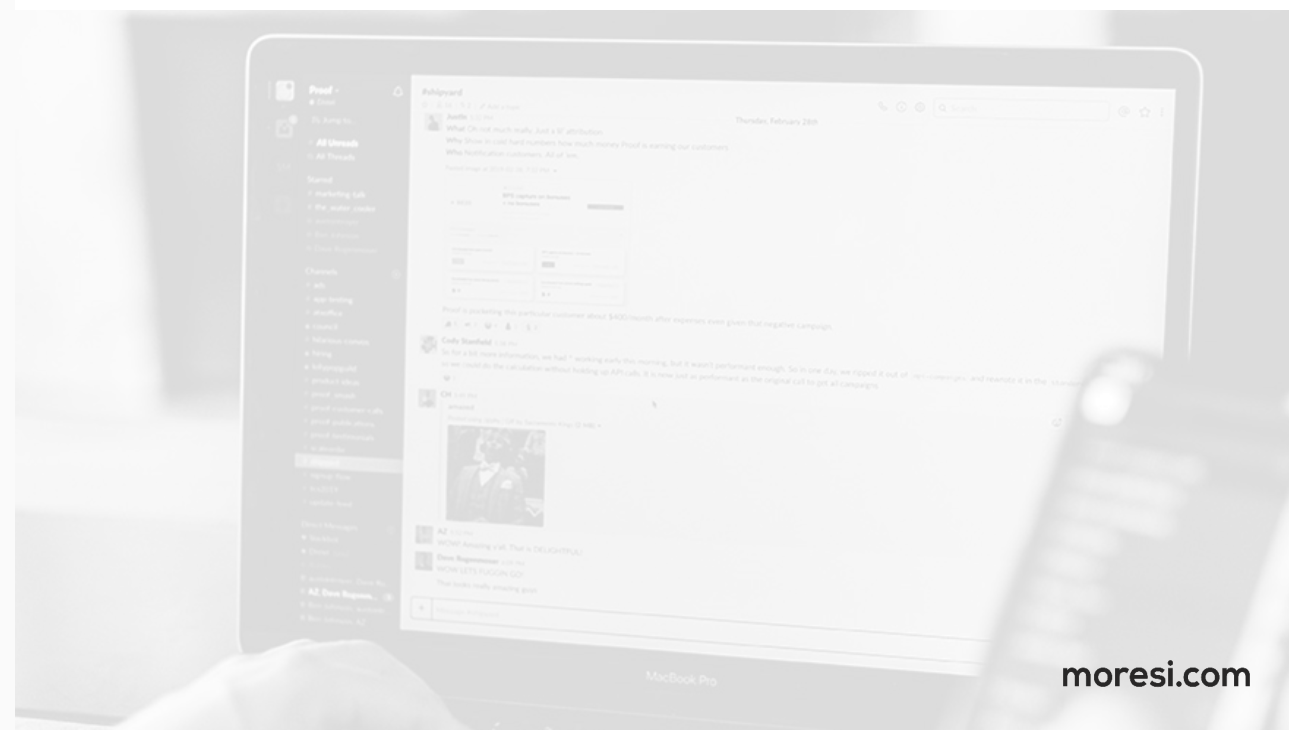

We simplify the license management process by ensuring you have uncomplicated license management, allowing you to focus fully on your business.

We support you to answer your questions, resolve any licensing issues and ensure that you always have complete control over your licensing situation in order to make your use of Copilot 365 efficient, transparent and compliant.

DURATION AND PRICES

At no additional cost in case of implementation.

Advisory

Advisory service for Copilot 365, provides periodic advice to ensure your continued success in Copilot adoption.

We focus on planning, goal monitoring, and customized strategies.

The service can be integrated with our workshops, and is tailored to your needs in a synergistic collaborative effort.

DURATION AND PRICES

Minimum of 3 days for a recurring meeting in the months following implementation / from 3,200 CHF
