BRINGING ROBOTS
TO EVERYONE

MOST DIGITAL
IN A NUTSHELL

Only 1 business

– Robotics and AI

Dynamic Lean Team

– Over 30 Object-oriented Programmers and high level consultants

100% RaaS

– True cloud service from Azure to any customer environment

Over 200 deliveries

– During 2017-2020 we have delivered hundreds of automated tasks

MOST Digital

MOST RAAS - ROBOT AS A SERVICE

A — **Everywhere you need it!**

– True Hybrid Integration Platform for EVERY possible source environment

B — **Not just RPA!**

– Flexible combination of different Robot, Integration and AI tools

C — **Do it Professional Way!**

– 100% Python, Enterprise level security, ITIL V3 compatible and much more

D — **Centralize – even with multivendors**

– Host and coordinate all your automation with one multivendor platform

MOST Digital

MOST-RAAS
100% SOLID SERVICE

- **100% Cloud service** from Microsoft Azure with full Azure SLA backing

- **100% cover – All you need as a one service package**: Robot tools, AI/ML solutions, Hosting services and environments, Management components, Surveillance solutions, Data warehousing, Continuous services and more

- **100% pay-as-you-go** service without vendor locks

- **100% Secure.** The whole service has been built on highest level security requirements – Audit and we'll deliver!

- **100% supported:** As an additional service get high level professional help with Process optimization, Change and Portfolio Management, Digitalization Transfer and more

- **100% modular.** Use any tools you like (open source preferred). Have your source code as Python 3 modules at Github. Work as you wish, no strings attached.

- **100% DIY-able,** if you just know how to dance with your Python

WE INCREASE OUR CUSTOMERS' PRODUCTIVITY

MOST Digital

We support all phases of robotic automation and data processing, from identification and analysis to the deployment of solutions and usage and promotion of automation.

As an implementation partner, our strengths include agile project management and lean-based process development and deep competence in financial management.
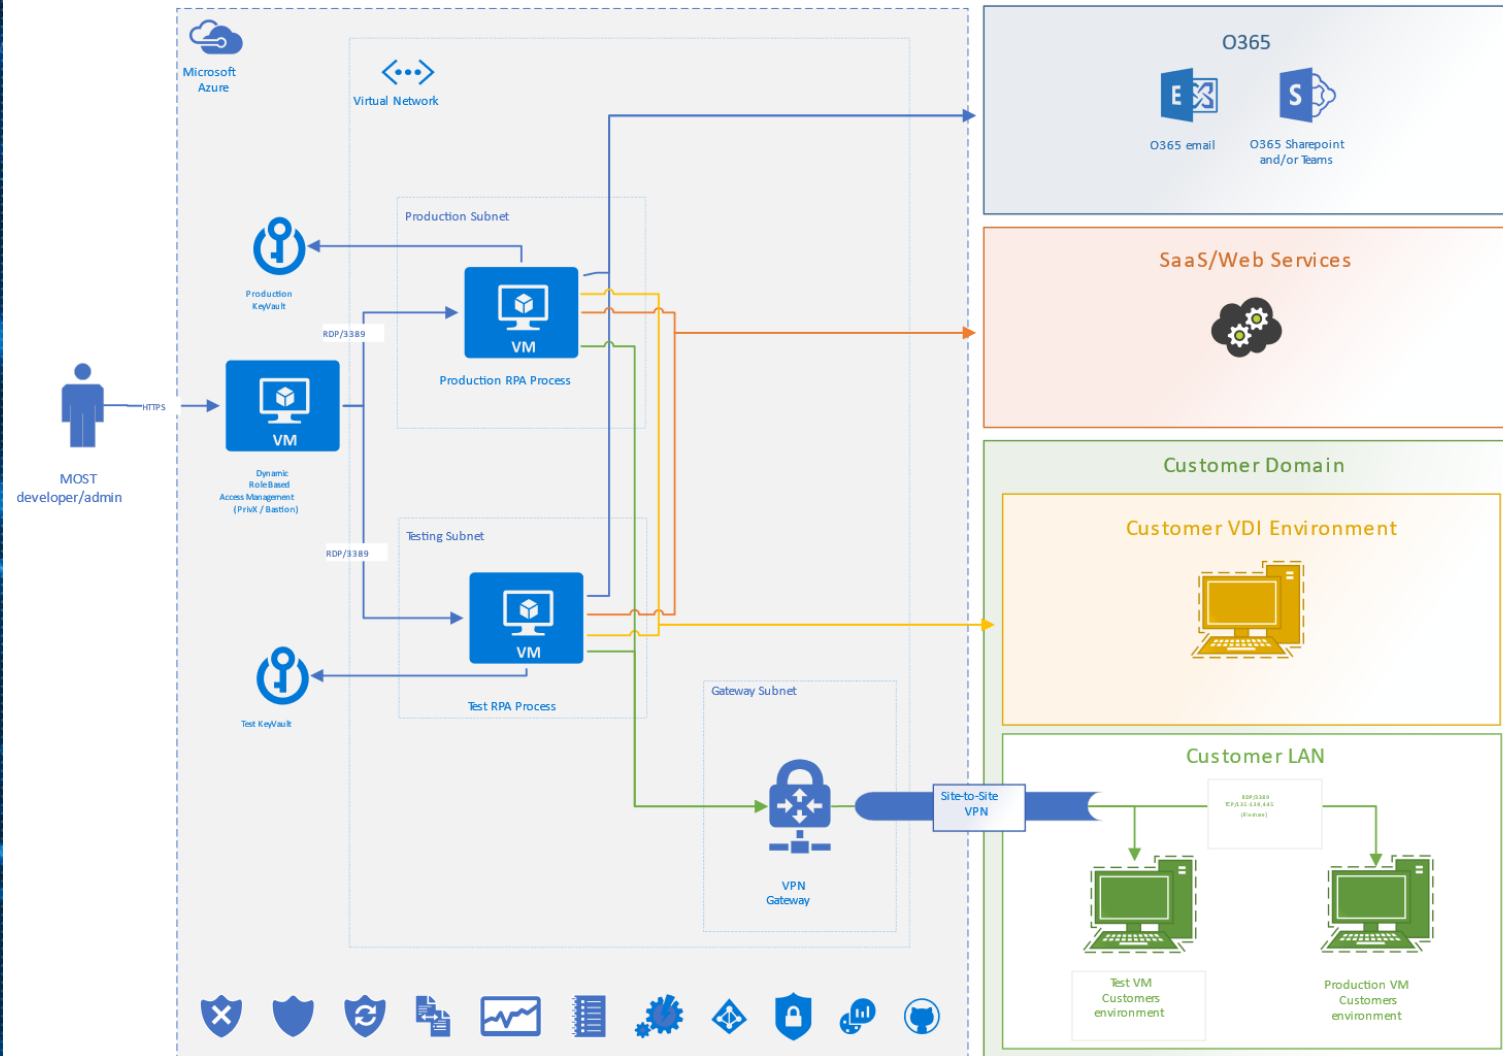

We are a technology-agnostic operator with competence in robot and machine intelligence implementations and automation using machine learning tools. We provide several robot technologies.

We are a competent change partner: we have experienced consultants to promote robot automation competence and to carry out changes in tasks, roles and organizations.
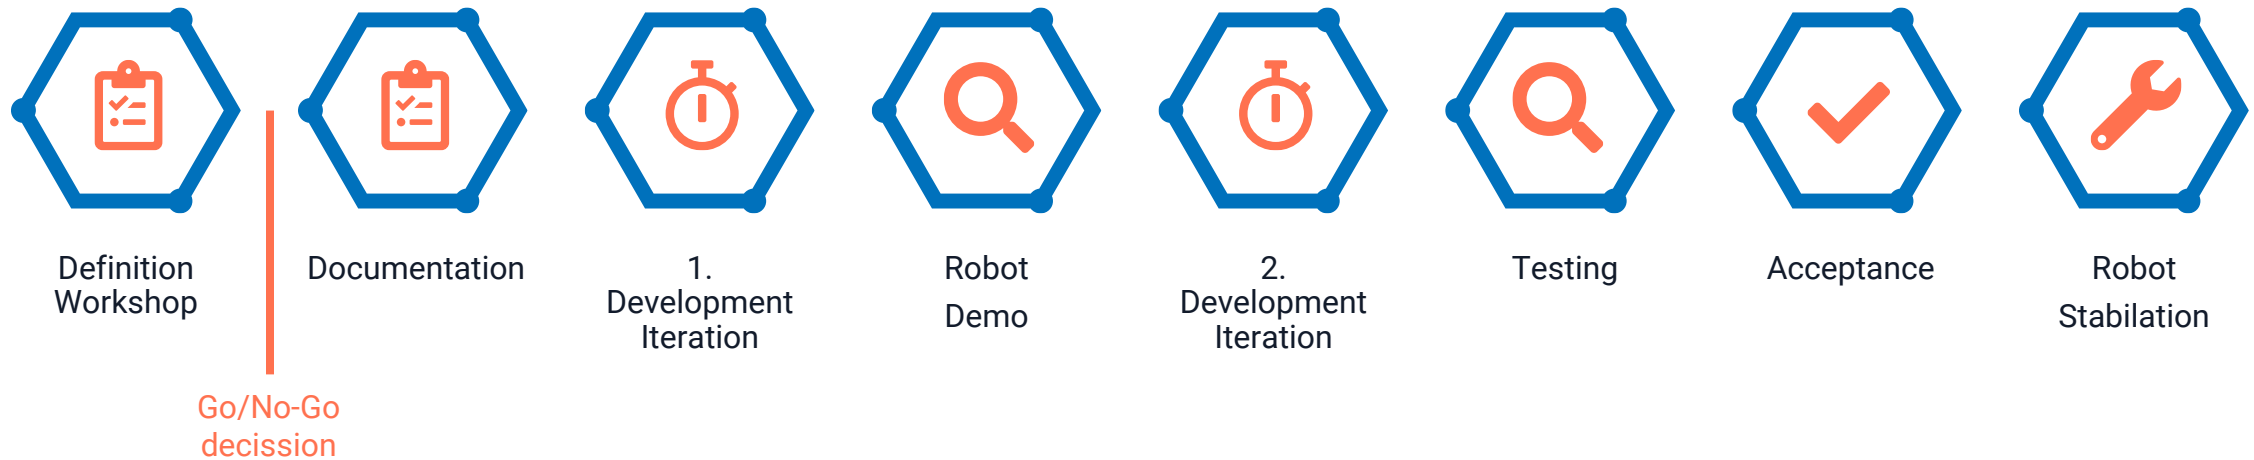

# ULTRA SECURE CUSTOMER SPECIFIC ENVIRONMENTS

LEAN AUTOMATION PROCESS
HAVE THE BENEFITS NOW!
