Dashboard Adoption Scan

To work succesfully data-driven, optimal use of dashboards is essential. Our Dashboard Adoption Scan provides each organization with a quick insight into the level of adoption and the opinions and wishes per user group. This allows you to continuously optimize the experiences of end users, so that they do not fall back into the use of different working methods and tools.

Five reasons to run our Dashboard Adoption Scan:

1

Quick insight
After the scan, you quickly gain insight into the use, valuation and improvement opportunities based on feedback from end users.

2

Improve and accelerate adoption
With insight into the user experiences, you can improve and accelerate the adoption of dashboards.

3

Increase return on investment
By improving and accelerating dashboard adoption, you can increase the return on investment.

4

New wishes and opportunities
The increasing use of dashboards creates new wishes and opportunities that brought to you quickly and efficiently.

5

Improve communication IT and business
Our Dashboard Adoption Scan is an easy way to improve communication between IT and business with regards to optimizing dashboard use.

Comparison of feedback per user group based on eight important dashboard features: accuracy, added value, completeness, design, navigation speed, reliability, reaction speed and overall quality

Application of ADKAR (Awareness, Desire, Knowledge, Ability and Reinforcement) model in elaboration of feedback

Analysis of user-level feedback based on functionality requirements and limitations

From intake to insights in just a week and a half

Intake

- Kick off
- Define user groups
- Analysis of the usage metrics of Power BI
- Coordination of content and questions

Implementation

- Customization adoption scan
- Send out questionnaire
- Analyzing results
- Reporting results

Presentation

- Delivery adoption scan
- Presentation results
- Highlight improvement opportunities
- Discuss next steps
