

Azure Well Architected Framework 1-hour briefing

OBJECTIVE: After completing this 1-hour briefing, the customer will have a clear understanding of the benefits of using Well-Architected Framework for assessing their workloads. The customer will know how an assessment is run and how to move forward.

The Microsoft Azure Well-Architected Framework is a set of guiding principles that can be used to improve the quality of one or more workloads in your Azure environment.

5 PILLARS

The WA-framework is based on five pillars of architecture excellence:

- Cost Optimization
- Operational Excellence
- Performance Efficiency
- Reliability
- Security

AGENDA

- Introduction to Well Architected Framework
- Overview of each pillar
- Overview of assessment results in Azure DevOps
- Next steps

Do you want to learn more about how you can assess your workloads?
