

Azure Cloud Migration

Get started with a 2-hour Workshop

Understand how Move's Cloud Migration Plan can help accelerate your journey to the Cloud. Move can help you understand how Microsoft's Azure Platform can help you accelerate your business' journey to the Cloud, giving your organization a competitive advantage. A quick way to get started with the move to Azure, is our 2-hour workshop which is designed to help clients evaluate the Azure platform. This includes streamlining the transition process by applying a proven integration approach based on a set number of servers, applications and workloads.

Typical agenda:

- Introductions
- Your Business Goals
- Azure Overview
- Innovative Design
- Cloud Platform
- Intelligent Data
- Security
- Application Modernization Strategy & Business Outcomes
- Q&A and Next Steps

Gold
**Microsoft
Partner**

Move's 2-hour workshop provides a high-level view of the Azure platform and how it can transform your existing data center.

The result is a road-map based on a long-term view of the costs associated with Azure's subscription model. You will also recognize what Azure can do for your organization. Whether you are looking to just test the waters, or leverage Azure as much as possible; Move can help.

Deliverables:

At the end of the workshop you will have a high-level plan of what it takes to migrate to Azure, as well as an understanding of timeline and costs. Our team will also highlight additional cost savings programs that Microsoft & Move have available to our clients.

Move has more than 30 years of experience in digitalization and transformation projects. We are in close cooperation with all the leading tech vendors. We are brand agnostic and pride ourselves on giving our customers the best advice based on their needs and the technology available.
