

MOVE TO DIGITAL CONTROL

Move specializes in IT infrastructure. We provide cutting-edge expertise, services and solutions to public and private companies throughout Norway. Through design, integration and management, Move provides businesses with cost-effective, secure and flexible IT solutions sourced from the best technologies and services available.

Move is a consulting company, systems integrator and service provider.

- **Move Consulting** is one of the major IT professional service environments in Norway with unique expertise in a wide range of technology areas. Our goal is to offer high availability of expertise to quickly deliver consulting capabilities to our customers.
- **Move Solutions** is one of the country's leading systems integrators. Through consulting and design, we offer our customers solutions tailored to their business, always based on leading technologies and services.
- **Move Operations** is a hybrid multi-cloud service integrator delivering "best of breed" services. We integrate services and solutions and manage all, or part, of your company's IT solution from our operations center, regardless of whether the solution is on premise, in a datacenter, or in the cloud.
