

# Get going with Center Of Excellence for your Power Platform

**Objective: Control, govern and nurture the usage of the Power Platform**

Are your Microsoft Power Platform environments expanding at a rapid pace, causing challenges for your IT team?

The Insight and functionality of a Microsoft Center of Excellence Dashboard helps you gain control of your entire Microsoft Power Platform and gives you the tools necessary to govern and nurture across your tenant.

The CeO for Microsoft Power Platform is a collection of components and tools designed to innovate and improve, bringing together like-minded people with similar business goals to share knowledge and success while maintaining standards, consistency, and organizational governance.

The concept can seem overwhelming. However, utilizing Microsoft components Move have learned to develop/set up a Center of Excellence dashboard, packed with insights and functionality.

## Deliverables

- Installed and configured Center of Excellence Dashboards
- Walk through of the dashboards

**Price:** In the range 35000 to 50 000 NOK, depending on your existing use of the Power Platform
