

Microsoft Azure Security 2- Days Assessment

Moves consultants can help assist you in focusing on security based on Secure Score in Microsoft Security. The service will be a good tool for companies that has not yet knowledge about the different security features that Microsoft offers, or for organizations that wants an overview and confirmation on the already implemented security routines.

What is Secure Score?

Microsoft Secure Score is a measurement of an organization's security posture, with a higher number indicating more improvement actions taken. Following the Security Score recommendations can protect your organization from threats. From a centralized dashboard in the Microsoft 365 security center, organizations can monitor and work on the security of their Microsoft 365 identities, data, apps, devices, and infrastructure.

Secure Score helps organizations

- Report on the current state of the organization's security posture.
- Improve their security posture by providing discoverability, visibility, guidance, and control.
- Compare with benchmarks and establish key performance indicators (KPIs).

With this assessment you will receive

Presentation of your security in your microsoft tenant with focus on:

- Identity- Conditional Access and Azure Identity Protection
- Data- SharePoint, OneDrive etc.
- Devices- General information about Intune
- Applications- Cloud App Security

Gold
Microsoft
Partner

At the end of the assessment the customer will be given

- Report on which security features that are implemented well and what the organization should focus on in the future
- Suggestions on measures we want to implement for your company

With a solid security fundamental, data security, device management, and shadow IT overview makes it easier and more secure to use SaaS, IaaS, and PaaS solutions through Microsoft Azure.
