## Ketendo Overview

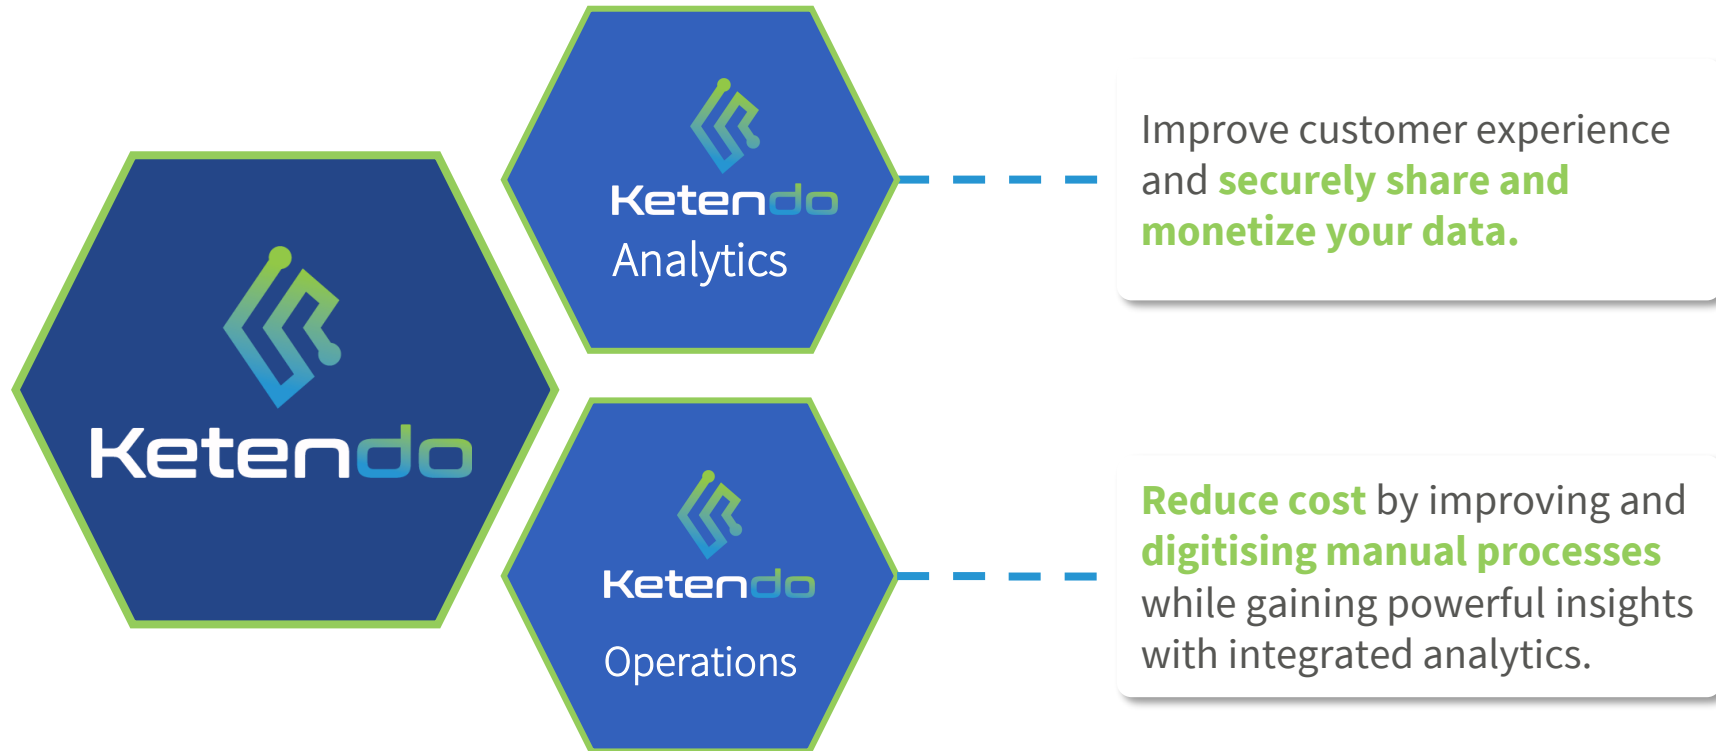

## What is Ketendo?

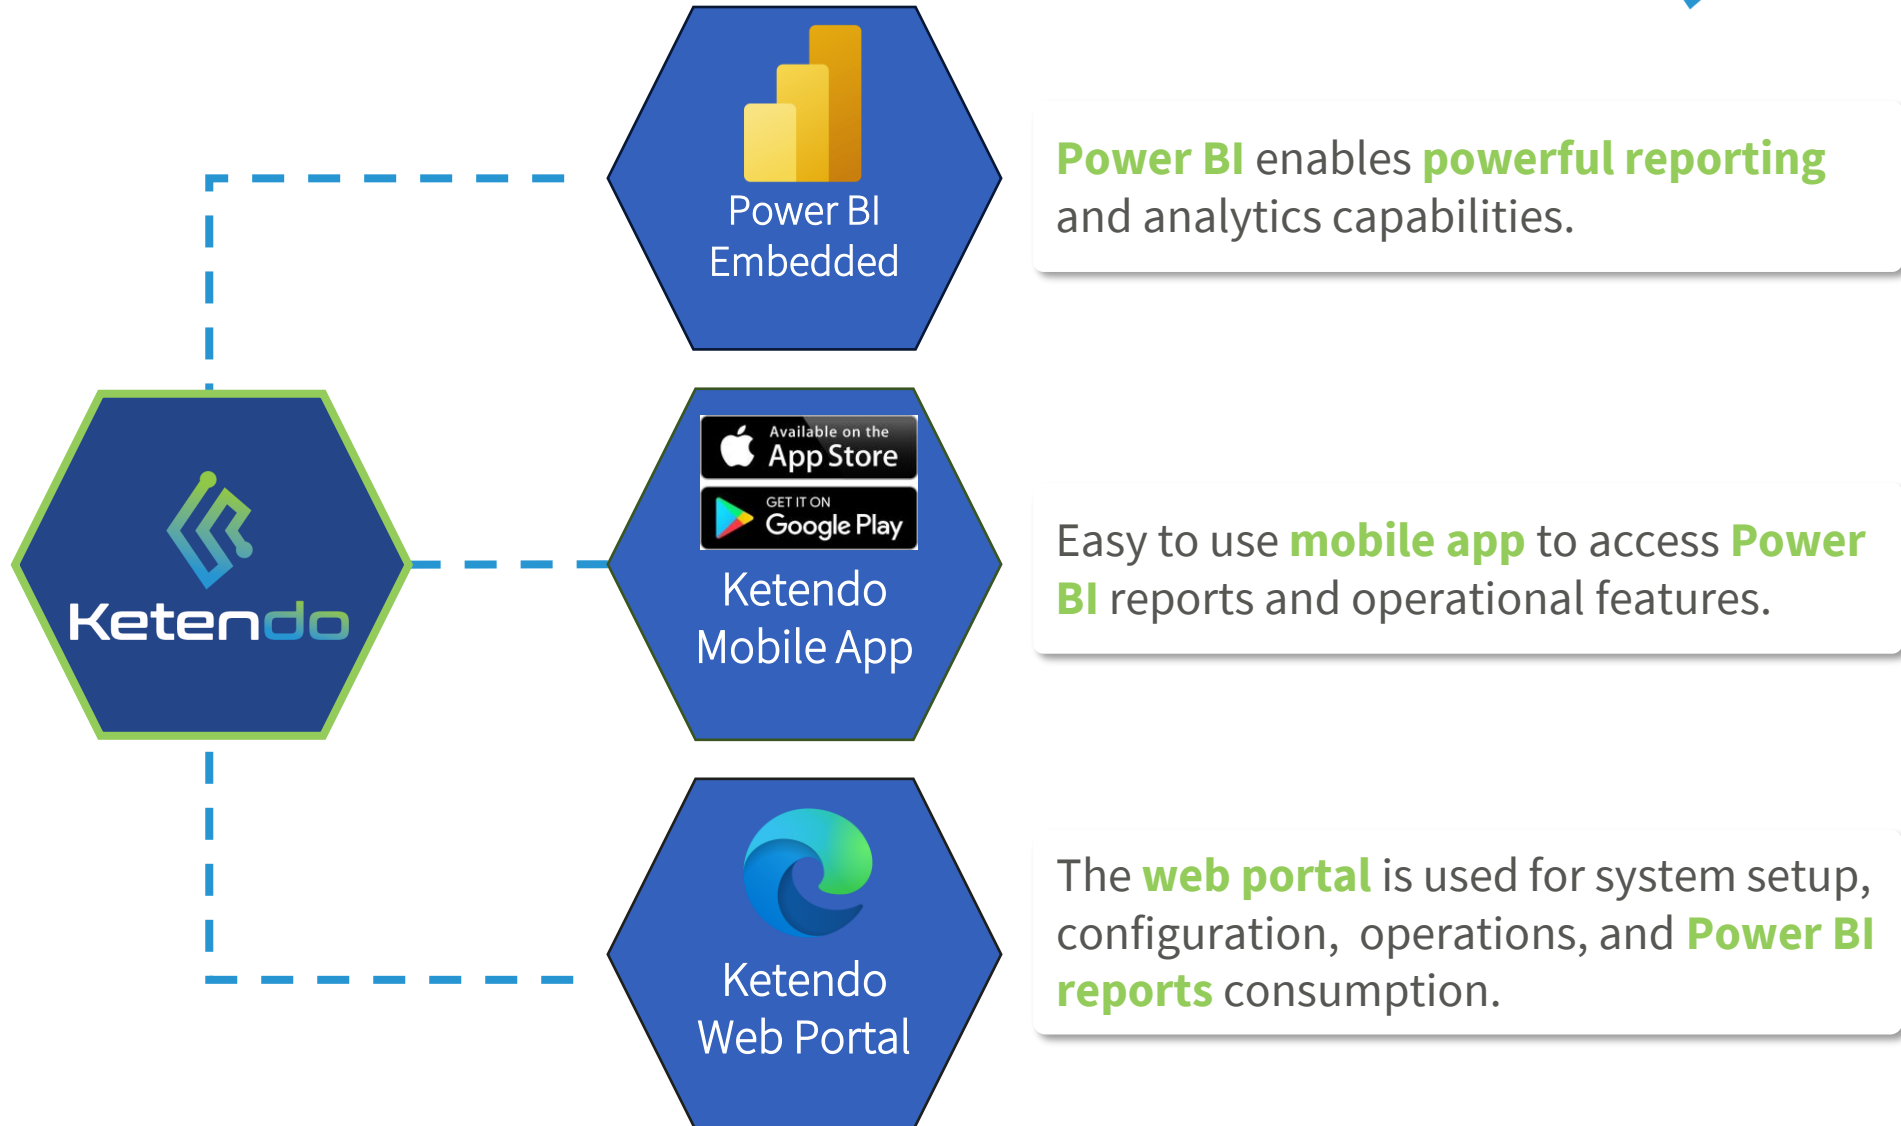

A customisable **data analytics and operational platform** that enables our clients to easily share interactive reports and digitise their business processes.

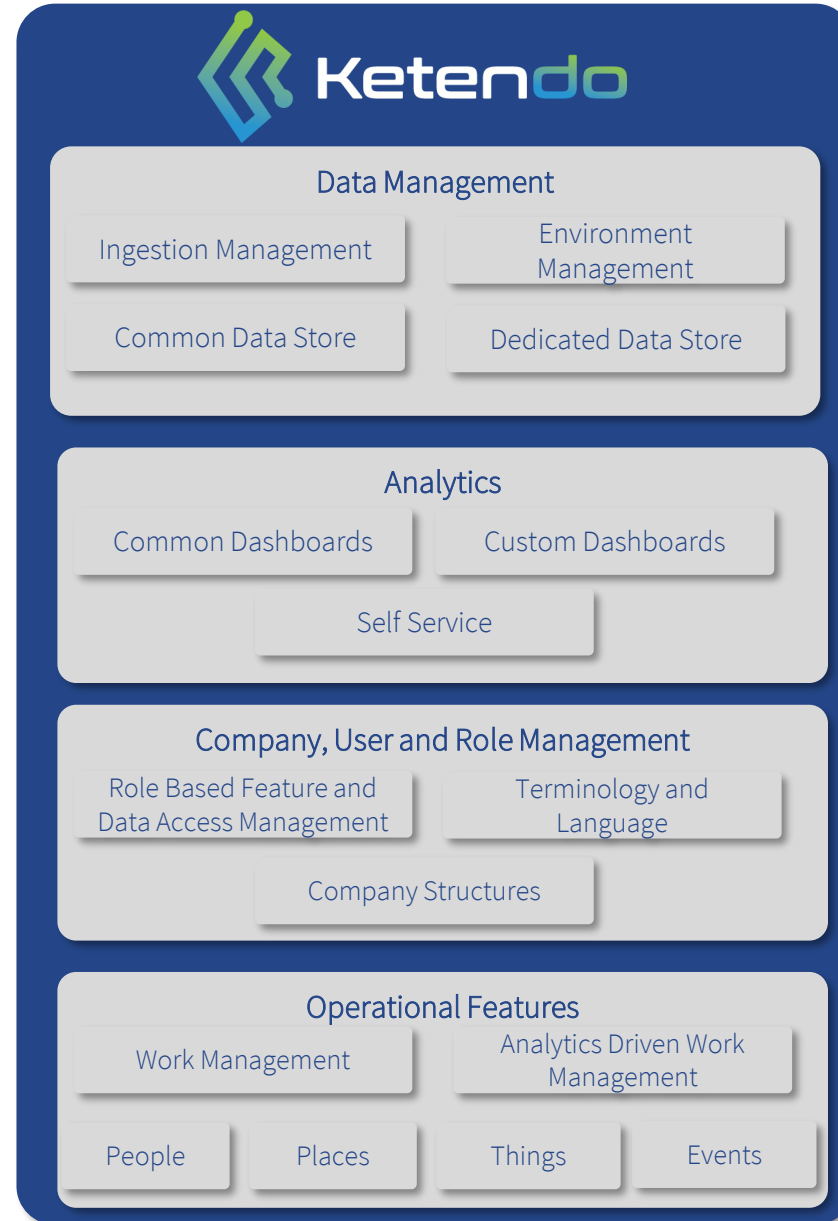

# Ketendo Core Offerings

# Core Components

# Capabilities

# Ketendo Solution Approach

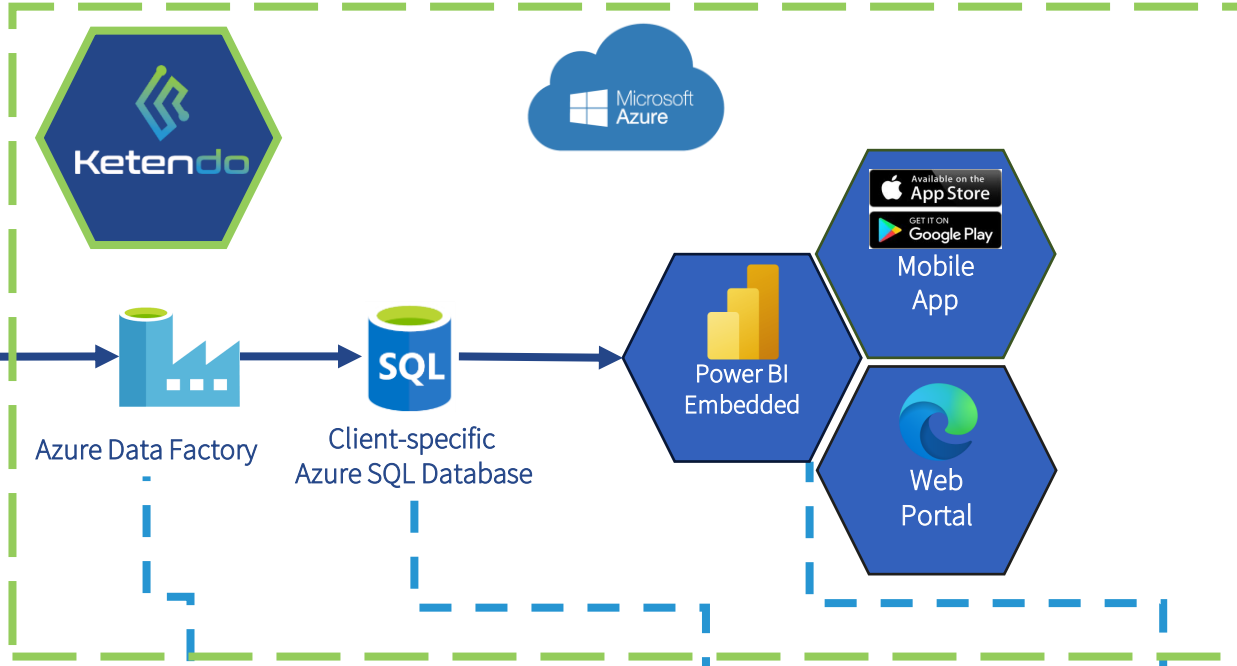

Ketendo can be configured to load data from various systems and data sources.

The Ketendo teams provide the required implementation, development and support services.

- Text Files
- Excel Files
- Microsoft SQL Server
- Azure SQL
- AWS
- Xero
- Sage
- PostgreSQL
- MySQL
- Skynamo

## Microsoft Azure-hosted Solution

Implement Data Pipelines and other Custom Integrations to ingest data into Ketendo client database.

Consolidate, clean, and transform data.

Power BI is used to visualize and display the transformed data.

Internal Users

External Client Users

Internal users and external clients can consume Power BI Reports and perform various operational functions via the Ketendo Web Portal or Mobile App.

# Ketendo Use-Cases

Seamlessly **share existing and custom developed Power BI reports** with **internal users** and **external clients** using the Ketendo Analytics module.

Our Finance data model makes **Business Intelligence Reporting** easy for organisations who wants to gain powerful insights from their **financial and operational** data sources.

Provides **financial yield estimation** and **actual performance reporting** using sales, QC, tree estimation and pricing data.

Help companies to create and **manage task assignments** for their workforce, track progress & **measure efficiency**.

# Ketendo Client Benefits

**Integrate multiple data sources** from various systems into a single platform that is **managed, monitored and maintained by Moyo.**

**Seamlessly share and gather important information** via the Ketendo web portal and mobile App

**Customise platform** to specific business requirements.

**No more complicated and manual processes** needed to **share** important data and reports with your internal users and clients.

Provides **white-labelling capabilities** to **personalise** the platform.

**Opportunity to commercialise own products and services.**

**Gain more value from existing Power BI reports** by sharing with clients and users outside of your organisation.

Benefit from continuous **development and enhancements of the platform.**

**Ongoing platform Support** with service desk.

# MOYO

**Unlock the Power of Data and  
Technology and gain a  
Competitive Edge**
