

Microsoft PowerBI Fundamentals Training Workshop + 1 Dashboard

Do you want to upskill yourself in Microsoft's PowerBI platform? Are you struggling to bridge the gap between data and decision-making, or do you find it difficult to consolidate various data sources into a single, meaningful dashboard or report? Then this course is for you!

By enrolling for one of our programmes, you will be taking the next crucial step towards gearing yourself for the digital revolution. In this era where data is regarded as the new oil, it is even more important to have the capability to transform raw data into an insightful and meaningful form, enabling more effective decision-making and facilitating business transformation.

At Moyo Data Academy, we regard ourselves as astute data people. Our facilitators are experts in their respective disciplines. Apart from being exceptional trainers, they have vast experience in their respective fields of expertise. Our extensive knowledge of the intricate layers of the data world enables us to impart real understanding of how the entire data process works, before delving into the detailed functionalities of a specific programme or system. This holistic approach to data training has elevated us to be a leading training facility.

Trusted Industry leader Gartner recognizes Microsoft as a Leader for the thirteenth consecutive year in the Gartner 2020 Magic Quadrant for Analytics and Business Intelligence Platforms.

During this course you will be equipped on how to connect disparate data sets, transform and clean the data into a data model and create charts or graphs to provide visuals of the data.

	Audience Overview	This course is designed for beginner to intermediate-level Power BI Corporate Teams. We accommodate groups between 1 and 12 users at a fixed price. It is for anyone who works with data. This course will show you how to link and model data in Power BI and create visual reports that reveal data insights. Although the Power BI desktop client will be the primary focus, an introduction to the Power BI web app will also be provided.
