- Messaging

STEP BY STEP SERVICE

Serving the unique security needs of Customers

INTEGRATED SECURE DEVICE MANAGEMENT

ISDM is a device and application management solution for any devices used by the users

BENEFITS

- Protect the devices you manage, and the data stored on those devices.
- People can work safely with company's data everywhere
- Secure access to email and company data with mobile devices anywhere in the world
- Customized solution based on Customer's security policy
- Enroll device encryption and security policies centrally
- Remove organization data if a device is lost, stolen, or not used anymore.
- Offer BYOD to all employees

INTEGRATED SECURE DEVICE MANAGEMENT

MANAGE DEVICES SECURELY

- Organization-owned devices – Full control
- Personal Devices (BYOD) – Full control or App protection with MFA
- Isolate organization data from personal data
- Secure access on personal devices by restricting actions users can take, such as copy-and-paste, save, and view.

ENROLLED DEVICES

- Get an inventory of devices accessing organization resources
- Configure devices to meet your security and health standards
- Push certificates to devices (accessing to Wifi and/or VPN)
- Reports on users and devices (compliant, or not compliant)

INTEGRATED SECURE DEVICE MANAGEMENT

MANAGE MOBILE APPS

- Designed to protect organization data at the application level.
- App management can be used on organization-owned devices, and personal devices.
- Add and assign mobile apps to user groups and devices.
- Configure apps and update existing apps already on the device.
- See reports on which apps are used and track their usage.
- Do a selective wipe by removing only organization data from apps.

INTEGRATED SECURE DEVICE MANAGEMENT

DEVICES

- PCs and laptops
- Mobile phones
- Tablets

PLATFORMS

- Windows 10
- Apple iOS, iPadOS 10.0+
- Mac OS X 10.9+
- Android 4.0+

INTEGRATED SECURE DEVICE MANAGEMENT
