Report on your work item and test plan data

Enhanced Export PRO lets you do reporting on **work item queries** and **test plans** directly from the web. You can preview, print or even open the report directly in Office with one click. To get the output formatted the way you want, you can use the out of the box templates, or create your own templates using the template editor to create your own template to get the form and layout you need.

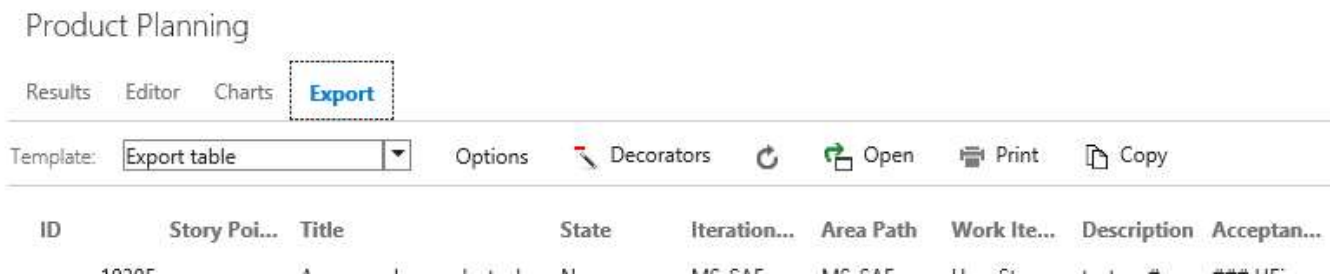

With the PRO version you can also **report on work item queries as it was at a specific point in time**. Enhanced Export PRO also have a lot of other options to include or exclude data, both for exporting Work

Item Queries and Test plans, and the possibility to add visual enhancements to your report with decorators.

Export Query tab

The Pro version brings an extra tab directly on the **query**, making it faster and easier to export your data.

You also got options to include **links**, **customize the fields you display for links**, **attachments**, **Discussion** and **expand test case data** in the export.

Time machine

With the Pro version you can view queries as they looked at a specific point in time. This is currently supported for Flat and Direct Links queries.

Currently TFS/VSTS doesn't support querying historical data for Tree queries. If you feel this should be fixed, feel free to report a problem through the Feedback/Report a problem menu and/or vote on this [\[\(https://visualstudio.uservoice.com/forums/330519-visual-studio-team-services/suggestions/32243707-support-asof-operator-historical-queries-for-tr "uservoice item"\)\]](https://visualstudio.uservoice.com/forums/330519-visual-studio-team-services/suggestions/32243707-support-asof-operator-historical-queries-for-tr)

Export Test Plan tab

The Pro version also brings an export tab directly on the **test plan** on the query, making it faster and easier to export your test plans.

Sprint 42 No iteration dates

Tests Charts **Export**

Template: Options

TEST PLAN 420: SPRINT 42

AreaPath: FabrikamFiber
 Iteration: FabrikamFiber\Iteration 1
 Owner: Mattias Sköld
 State: Active
 StartDate: 2017-02-07
 EndDate: 2017-02-14

Test plan hierarchy

Suit	Outcome	Defects
▼ Sprint 42: 421	5	1
▼ Regression tests: 422		
▼ Custom order process: 428		
▼ Tech support process: 429		
▼ New features: 423	5	1
> 273 : Verify the product catalogue can support Amazon integration loads: 425	2	
> 274 : Add Personalization to the ordering process: 426	2	1
▼ 278 : As a user I want to view my product by category so that i can more easily	1	

The Test Plan tab requires VSTS or TFS 2017.1 to work, for earlier TFS versions test plan export through context menu is available

You also got options to include **test steps**, **test results**, **test results attachments**, **test results details**, **bugs**, **shared steps** and **parameters**.

Decorators

You can add visual effects to your export by adding simply add pre-made **decorators**.

My Bugs

Results Editor Charts **Export**

Template: Options Decorators Open Print Copy

ID	Priority	Severity	State	Title	Assigned To	Original Est...	Remainin...	Complete...
107	1	1 - Critical	Resolved	Slow response on infor...	Mattias Sköld...	8	0	6
100	2	2 - High	Active	Create bugs	Mattias Sköld...	32	15	4
206	2	3 - Medium	Active	Create bugs	Mattias Sköld...	12	6	8
104	4	3 - Medium	Active	Show bugs on backlog...		6	6	
207	4	4 - Low	Active	Show bugs on backlog...		4	4	1

Decorators can have properties you can change at run time. You can also modify existing or create your own decorators with the decorator editor!

Options

With **Options**, you can both control what data to query for and use it from your templates to control

rendering at runtime.

Out of the box you have two grid templates, offering support for

- **Hierarchical queries**
- **Summarizing child values**
- **Resizable columns** You also have a Traceability matrix template showing a matrix based on work item links.

Bugs
