

Assessment for Hungarian Business Central Implementations

Service Objective

Our Business Central assessment service aims to assist enterprises planning to implement Microsoft Dynamics 365 Business Central in Hungary. During the assessment, we review all regulatory requirements necessary for localization and provide solutions to ensure compliance within Business Central.

Compliance Review

During the assessment we examine all the regulatory-related topics for a Hungarian implementation of Business Central, including the following:

- chronological order for general ledger entries
- modified production posting logic
- tax authority and auditor data export
- foreign currency bookkeeping with MNB exchange rates
- VAT management
- Online Invoice
- fixed asset management with expanded reporting and history tracking
- bank management with foreign currency handling
- etc.

Fit&Gap Documentation

At the end of the assessment, we create a detailed Fit&Gap documentation that includes our recommendations to ensure compliance with regulatory requirements. The documentation thoroughly outlines the areas reviewed and the proposed solutions that ensure your company fully meets Hungarian laws.
