

# Automate claims processing with MYclaim

## MYclaim

MYclaim is an intelligent claims automation platform designed to help health insurers process high volumes of complex claims faster, more accurately, and at significantly lower operational cost.

## KEY METRICS

The impact is immediate and measurable, significantly improving processing speed, accuracy, and operational scalability

**up to 85%**

reduction in manual workload

**10x**

Faster claims processing

## CHALLENGES

Health insurance providers process hundreds of claims every day, each involving multiple documents such as prescriptions, receipts, medical examinations, and invoices. Manual document processing results in long claim turnaround times, high administrative costs, and increased error rates and compliance risks. As claim volumes and complexity grow, these inefficiencies directly impact customers, leading to delayed reimbursements, lower satisfaction, and an increased risk of churn.

**Diverse Document Formats**

**Regulatory Pressure**

**Operational Bottlenecks**

## SOLUTION

MYclaim automates the end-to-end insurance claims process using AI and intelligent document processing. It seamlessly integrates into existing insurer ecosystems, enabling faster, more reliable claim handling while maintaining full compliance and security.

## CAPABILITIES

1

### Seamless Integration

Designed to integrate effortlessly with core systems using APIs, XML, RPA, Excel, and more.

2

### Smart Document Handling

Intelligent processing of PDFs, images, and handwritten documents.

3

### Compliance and Security

Built in compliance with all international standards that guarantee information security and process quality.

**MY SYNERGY**  
Value Digital Health & Care
