

MyWay Clinical

Integrated clinician and organisation management tool

A game changing clinician platform integrating data from across the health care provider organisation, and home recorded data to provide a complete diabetes electronic health record and analytics platform. Supports patient care through data-driven decision support, alerting, business intelligence, performance (KPI) reporting, risk prediction and links with MyWay Diabetes to support remote patient communication and home data review.

Providing clinicians with the correct tools and information

- ✓ Electronic health record; supporting clinic workflow
- ✓ Data-driven decision support; improving compliance with guidelines
- ✓ Predictive analytics; delivering personalised patient management
- ✓ Secure patient communication tool and data sharing, supporting remote/ virtual clinics

Giving organisations direct cost saving overview

- ✓ Diabetes KPI tracking for 9 care processes and key treatment targets
- ✓ Identify out-of-target/ overdue patient cohorts for targeted intervention
- ✓ Flexible audit queries and quality improvement tracking
- ✓ Population risk stratification for key diabetes complications
