

Cloud Pulse

Accelerator emphasizes on...

- Automated Policies for Cost Optimization
- Compliance as a Code
- Streamlines cloud governance
- Support all pillars of well-architected frameworks
- Support Enterprise Security Posture

Pulse check of....

CTO : worried about the spiraling cloud cost in the organization

CISO : stressed about managing security on cloud

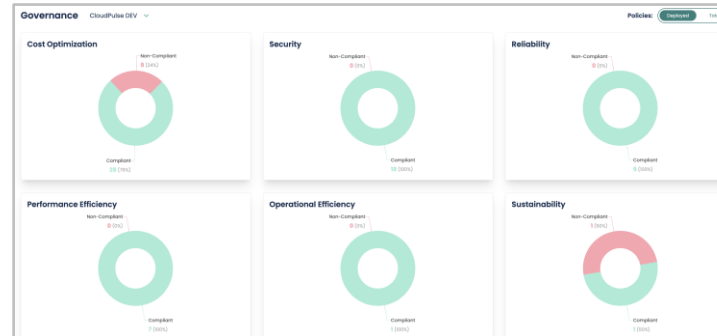

Compliance Officer : Struggling to effectively implement rapidly evolving compliance policies

Cloud COE : stressed about various aspect of cloud governance

Quick peek

CloudPulse : Policy Governance View

Policy Name	Policy Type	Cost Saving
Low CPU Utilization RDS Instance	CostOptimization	\$ 136.08 ↗
Off Hours EC2 Instance Alert	CostOptimization	\$ 119.52 ↗
Old ECR Images Alert	CostOptimization	\$ 29.89 ↗
Low CPU Utilization EC2 Instance	CostOptimization	\$ 16.72 ↗
Unused Elastic IPs Filtering	CostOptimization	\$ 14.40 ↗

Enablers – Key features

- Cloud Waste Management with remediation
- Policy Workflow automation
- 100+ cloud best practices across cost & security pillar
- Compliance as Code
- Multi-account deployments
- One Click Deployment
- Multi Cloud Support
- Policy as code, write policies in your own context

We promise...

- No “recurring” licensing cost.
- Automated cloud governance, security & compliance.
- Saves design & engineering effort of 1500+ hours.
- Supports real-time monitoring, alerts & remediation.
- Flexibility to support customized need/integrations for managing cloud infrastructure.
