

Accelerate your quality with DRIVEN

D – Digital, R – Robust, I – Intelligent, V – Value-Centric, EN - Engine

Change is the only constant – and at an increasingly fast pace. Projects often become a balancing act between speed and quality. Frequent & fast releases require a complex and repetitive testing process. Automation speeds this up, increases coverage and reduces business risk, while increasing the efficiency of testers in finding bugs and ensuring overall quality.

Automation allows us to break free from the waterfall paradigm, making quality an essential part of a truly integrated development cycle.

Our Services

360° Test Automation Health Check

- See if Test Automation is right for your with our tried-and-true ROI checker
- Check your Test Automation readiness
- Streamline and improve your existing Test Automation

Test Automation Kickstart

- Evaluate the Test Automation technology market along our extensive evaluation criteria catalogue
- Get a hands-on start with Test Automation
- Choose the right technology stack for your landscape

Managed Test Automation Services

- Safely change legacy systems by covering them with a right-size Test Automation suite
- Let Nagarro take care of automating your existing test suites

DRIVEN Features

Testing Areas Supported

- Web and Mobile applications
- Web services and Database
- Desktop UI

Other Features

- Multi browser/environment support
- Support for multi lingual applications
- Self-healing capability

Reporting Integrations

- Tool and technology agnostic
- Intergration with CI/CD tools
- Test management tools

Multiple Test Design Patterns

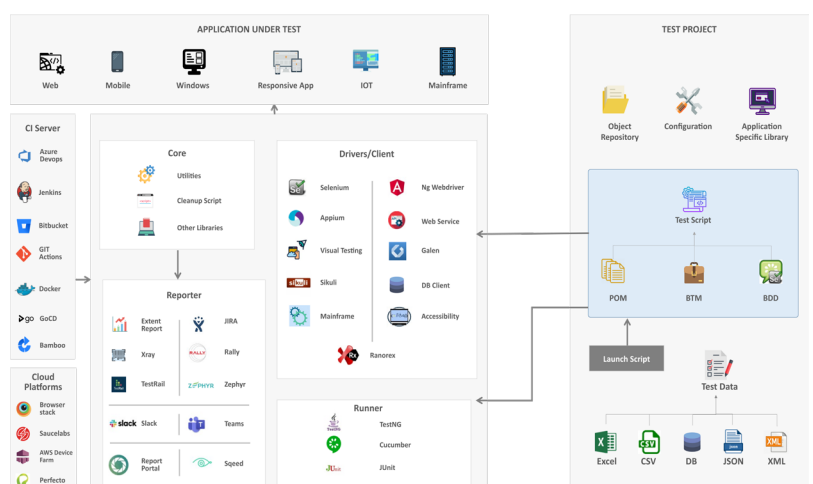

- Page object model
- Business Transaction Model
- Behavior Driven Development

More than 40% ROI with DRIVEN

Test Automation is not Easy

But using Nagarro’s own tool neutral best-of-breed automation solution DRIVEN and our Advanced Automation Approach (A2A), we can make it easy for you; along the whole lifecycle of application and beyond, creating and managing your very own sustainable & reliable quality solution.

Join more than 70 companies that are already using DRIVEN and benefit from our experience and robust, flexible technology!

Our Service Offerings

Success Stories

ÖBB Ticket Shop

We automated more than 5,000 test cases to ensure quality every step of the way. Thousands of automated test cases run each day to enable the manual testers to ensure the new features are delivered in the expected quality.

Vienna International Airport

We managed to reduce the maintenance. Years later the tests are still running stable. Our test automation solution has been rolled out as the standard automation framework for test automation ever since.

Automated Track Inspection

We automated the track inspection and maintenance by reducing the turnaround time during execution to 8 hours giving high data coverage and gave more confidence on build quality.

Testimonial

Thomas Dworschak

Head of IT-Development, Vienna Airport AG

“With the automation framework developed by Nagarro, our testers can focus on what’s really important: finding bugs.”

Our Expertise and Experience

- 120+ Test automation projects
- 25+ Years of experience
- 1000+ Quality engineering experts
- 50+ Tool & technology integrations
- 30+ Talks at conferences
