

Engineering a DataOnCloud platform for enterprises

With the growing data volume and complexity, enterprises need a Data Engineering Platform tailored to their requirements, which acts as a one-stop-shop for their end-to-end data journey.

This centralized and integrated solution collects, stores, manages, and analyzes large-scale data sets with efficiency and scale, helping businesses with actionable insights for data-driven decision making.

Simplify data management and enhance data quality with Nagarro. Talk to us to plan, build, and manage your enterprise DataOnCloud platform!

Thinking Breakthroughs

Platform features:

- **Low code:** Drive fast and cost-effective app development. Offers better productivity, accessibility for non-technical users, scalability, and flexibility.
- **Multi-cloud single code base:** Effortlessly operates in a multi-cloud environment, eliminating the need for extensive modifications. Currently works on Azure, AWS and Snowflake.
- **Cloud agnostic:** Migrates seamlessly between multiple cloud platforms without service disruption and scales on-demand.
- **PaaS integration:** Seamlessly integrates with various PaaS offerings, empowering users to utilize multiple services and resources.
- **Imperative to Declarative:** Describes the programs to be executed by leveraging Declarative programming, ensuring efficient data processing and seamless transformation.
- **Golden record creation:** An MDM to create golden records. All basic and custom algorithms can be applied and data stewards can also work on them.
- **Data mesh design:** Utilizes decentralized data ownership, self-serve infrastructure, federated data governance, and data reliability to enable data collaboration.
- **AI Enablement:** Allows seamless integration of AI within the platform, focusing on desired outcomes and enhancing flexibility and scalability.
- **LLM Integration:** Integrates with LLMs, talks to Snowflake Data Warehouse or databases like PostgreSQL and derives information out of them.
- **Accelerated development and testing:** Delivers faster development and testing. Save your workflows and edit them in different engagements. Extend capabilities vwith your pre-extended workflows .

About Nagarro

Nagarro is a global digital engineering leader with a full-service offering, including digital product engineering, digital commerce, customer experience, AI and ML-based solutions, cloud, immersive technologies, and data engineering. We leverage our industry expertise and unique suite of technology solutions to help organizations become AI and data forward. Our offerings are guaranteed to be gamechangers for your business. We help you bring in the full power of AI and data to streamline your processes and gain deep insights for smarter business strategies. We are a digital transformation partner for leaders across industries such as **NORDEN**, **Hitachi Astemo**, and **Hood Industries**.
