

SupplyView.ai helps increase visibility in supply chains through conversational AI and analytics

Key Benefits

Better Decision Making

-  Automatically create visuals, analyze trends and spot outliers
-  Easier analytics compared to Pivot tables and manual calculations

Improved Visibility

-  Catch events which may be missed without real-time reporting
-  Save time spent on manually consolidating data

Accelerated Insights

-  ~40% faster deployment of analytics and AI use-cases
-  ~25% reduction in total cost of ownership

Brings valuable insights through...

- + Regional sales forecasts
- + Cycle service level estimation
- + Analysis of stock preparedness
- + O2C lead time tracking
- + OTIF rate analysis
- + Maverick spending alerts
- + Insourcing vs 3PL analysis
- + Inventory to sales ratio
