

ChatGPTeMail

ChatGPTemail empowers users to compose and respond to emails professionally through ChatGPT.

Upon typing the email body, users can effortlessly enhance their message's language and tone by clicking the add-in icon. The add-in seamlessly transforms the email while preserving the original message, allowing users to compare the before and after versions.

To use ChatGPTeMail, one must install the add-in and use Outlook 365 web or desktop application.

Users must create an account and obtain an API key.

ChatGPTeMail Configuration	Image
There is a configuration step that can be used in assisting how your email is processed with ChatGPT. To use the ChatGPTeMail configuration you simply open an existing email and select the ChatGPTeMail icon found in the Add-in pane.	A screenshot of the "ChatGPT Configuration" dialog box. The dialog has a title bar with the "NAJ" logo and the text "ChatGPTeMail" and a close button (X). The main content area is titled "ChatGPT Configuration" in blue. It contains three sections: "APIkey" with a text input field containing "your API key goes here"; "ChatGPT Prompt" with a text input field containing "What is a better way to say:"; and "Post Comment" with a text input field containing "This response was generated by". Below these fields is an "Update" button.

To transform your email, you select the option to compose a new email or select reply to an existing email. Compose your email message and then select the ChatGPTeMail icon found in the Outlook Add-in ribbon. Your message will be transformed into a professional email or reply.

Simple right?

ChatGPTeMail icon

The screenshot shows an Outlook email composition window. A red arrow points to the 'ChatGPTeMail' icon in the 'Add-ins' section of the ribbon. A message window titled 'ChatGPT processed your request' is overlaid on the right side of the email body. The message window contains the following text:

ChatGPT processed your request

Developed by NajTech LLC

ChatGPTeMail processed your request, please click on X in the top right corner and view results in your email

The email body text is as follows:

Hi Lee, I hope you're doing well! Here's how to use ChatGPTeMail: after you've finished writing the email body, click on the ChatGPTeMail icon, which is located in the Add-ins section of the Outlook ribbon group. Once you click it, a Message Window will pop up, showing you when the ChatGPTeMail process is done. To close the window, press the X in the top right corner – and voila! You should see the professional changes in the email body. Thank you for your time!

Hello Lee

I hope all is well. Here is an example of how to use ChatGPTeMail. After filling in the email body, click on the ChatGPTeMail icon found in the Outlook ribbon group called Add-ins.

Once you click on the icon, a message window will appear showing that the ChatGPTeMail process is complete. Close the window by clicking on the X in the top right corner. That's it. you should see the professional results right in the body of the email.

Thanks
