NAVARA

Modernize your apps: the 6 week promise

Modernize your legacy systems and build new applications in Azure. Navara follows the Microsoft Azure Well-Architected Framework and through that we ensure that all architecture and network design follows the best practices set out by Microsoft Azure. The framework consists of five pillars of architecture excellence:

1. Cost Optimisation
2. Operational Excellence
3. Performance
4. Efficiency
5. Reliability
6. Security
7. Sustainability

Microsoft Solutions Partner

This is how we do it

Experience your scalability, security and cost optimization benefits from modernizing your apps to Azure with a minimum of effort and a maximum of knowledge transfer from our experts.

In 3 steps to digital performance:

1. **Ignite:** UX/UI design, project setup, architecture, technical runway, 'walking skeleton', roadmap/backlog, kickoff.

2. **Perform:** Implementation, soft launch, and go live.

3. **Improve:** Improve platform with data and feedback. Onboard and train in-house developers.

About Navara

Navara is a high-end IT consultancy specializing in software development. Software and data increasingly determine your competitive advantage in the market. Therefore, we assist conventional businesses in transitioning into technology companies. We believe that a better developer experience leads to improved software delivery, thereby significantly enhancing our clients' business results.
